

2/2 way diaphragm valve with (Positioner) electric linear actuator (Type EVA)

- Safety position through energy storage
- Adjustable driving force
- Diagnostic functions and fieldbus connection
- Surfaces in contact with the product from Ra ≤ 0.38 µm...1.6 µm (optionally electropolished)
- Available in connection sizes DN 06...DN 40

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type 3323 2/2 way diaphragm valve with (ON/OFF) electric linear actuator (Type EVA)	▶
	Type 3361 Electromotive 2 way globe control valve	▶
	Type 8098 FLOWave SAW flow-meter	▶

Type description

The externally controlled diaphragm valve Type 3363 consists of an electrically controlled linear actuator (positioner), of a diaphragm and a 2 way valve housing. The electric actuator with recirculating ball screw ensures use under hygienic or aggressive environmental conditions. The flow-favorable and dead space-free valve housings enable high flow values and a wide range of possible uses. In the event of a power failure, the safety position is guaranteed by an optional energy storage device. The position is displayed by means of a 360° LED light ring. To protect the diaphragm the actuator has a drive force adjustment. A correspondingly high IP protection IP65/IP67 ensures adequate splash protection. In addition to a fast actuating speed of 1.5 to 4.5 seconds, the actuator is also equipped with a mechanical position indicator and a corresponding explosion protection ATEX/II 3G Ex ec IIC T4 Gc/II 3D Ex tc IIIC T135 °C Dc.

1. General technical data

Product properties	
Dimensions	Detailed information can be found in chapter "4. Dimensions" on page 8.
Material	
Forged body (VS) ^{1,3}	Forged stainless steel 316L/1.4435/BN2, Fe <0.5 %/C ≤0.03 %
Tube valve body (VP) ^{1,3}	Stainless steel 316L/1.4435/BN2
Cast body (VG) ^{1,3}	Cast stainless steel 316L/1.4435
Plastic body (PV; PD; PP) ^{1,3}	PVC (PVC-U); PVDF; PP
Diaphragm	EPDM (AD) ^{1,3} , PTFE/EPDM (EA) ^{1,3} , advanced PTFE/EPDM (EU) ^{1,3} , Gylon®/EPDM laminated (ER) ^{1,3}
Design	Diaphragm control valve
Diaphragm size	8...40; for plastic body 15...40
Standard surface quality^{2,3}	
Forged body (VS) ^{1,3}	Internal electrically polished: Ra ≤0.38 µm (NO17) ^{1,3} (ASME BPE SF4/DIN HE4) (external forged surface electrically polished) Internal mechanically polished: Ra ≤0.5 µm (NO14) ^{1,3} (ASME BPE SF1) (external forged surface)
Tube valve body (VP) ^{1,3}	Internal electrically polished: Ra ≤0.38 µm (NO17) ^{1,3} (ASME BPE SF4/DIN HE4) External glass bead blasted: Ra ≤1.6 µm (NO01) ^{1,3} Internal glass bead blasted: Ra ≤1.6 µm (NO05) ^{1,3}
Cast body (VG) ^{1,3}	Internal electrically polished: Ra ≤0.6 µm (NO16) ^{1,3} (ASME BPE SF6) (external cast surface electrically polished) Internal mechanically polished: Ra ≤0.76 µm (NO06) ^{1,3} (ASME BPE SF3/DIN H2) (external cast surface)
Safety setting in case of power failure	With SAFEPOS energy-pack: open, closed or freely programmable Without SAFEPOS energy-pack: blocked in last position
Lifelong energy storage SAFEPOS energy-pack	Up to 10 years (depending on operating conditions)
Controller version	Positioner or process controller (optional)
Performance data	
Closing time	< 1.5...4.5 s. depending on diaphragm size
Traverse speed	4 mm/s
Dead band of the positioner	±0.4 %
Electrical data	
Operating voltage	24 V DC ± 10 % (max. residual ripple 10 %)
Operating current ^{3,4}	Max. 3 A (at max. load and including 1 A charging current of the optional SAFEPOS energy-pack)
Protection class (DIN EN 61140)	3
Duty cycle	100 %
Standby consumption ^{3,4}	2...5 W
Communication and control	
Norm signal (analogue)	Setpoint value: 0/4...20 mA, 0...5/10 V and binary input (further inputs & outputs optional, see "5.2. Electrical control unit and interface" on page 13)
Feldbus (digital)	Bürkert-Systembus (bÜS) CANopen (Option) EtherNet/IP, PROFINET, Modbus/TCP (Option über integriertes Gateway)
Medium data	
Process medium	Neutral gases and fluids, highly purified, sterile, aggressive or abrasive medium (see chemical resistance chart ▶)
Medium temperature	
EPDM (AD) ^{1,3}	-10...+143 °C (steam sterilisation + 150 °C for 60 min)
PTFE/EPDM (EA) ^{1,3}	-10...+130 °C (steam sterilisation + 140 °C for 60 min)
Advanced PTFE/EPDM (EU) ^{1,3}	-5...+143 °C (steam sterilisation + 150 °C for 60 min)
GYLON®/EPDM laminated (ER) ^{1,3}	-5...+130 °C (steam sterilisation + 140 °C for 60 min)
Plastic body	See "3.2. Pressure temperature diagram for plastic body" on page 6

Process/Port connection & communication

Port connection size	DN 06...DN 40 (1/8" ... 1 1/2")
----------------------	---------------------------------

Port connection^{2.)}**For stainless steel body^{4.)}**

Welded connection ^{2.)}	DIN EN ISO 1127/ISO 4200/DIN 11866 series B DIN 11850 series 2/DIN 11866 series A/DIN EN 10357 series A ASME BPE/DIN 11866 series C
----------------------------------	---

Clamp connection ^{2.)}	DIN 32676 series A (DIN pipe) DIN 32676 series B (ISO pipe) ASME BPE
---------------------------------	--

For plastic body

Spigot connection	DN 15...DN 40
True union	DN 15...DN 40
Loose flange	DN 15...DN 40

Electrical connection

Actuator	Terminal strip with cable gland, 2 x M20 or 2 M12 circular plugs, 5 pin and 8 pin
Fieldbus gateway	2 M12 circular sockets, 4 pin (only with Industrial Ethernets)

Approvals and certificates

Ignition protection class	II 3G Ex ec IIC T4 Gc II 3D Ex tc IIIC T135 °C Dc
---------------------------	--

Environment and installation

Ambient temperature	- 10 °C...+ 65°C ^{5.)} (without display) - 10 °C...+ 60°C ^{5.)} (with display) - 10 °C...+ 55°C ^{5.)} (with SAFEPOS energy storage)
Degree of protection	IP65/IP67 (DIN EN 60529), NEMA 4X

Vibration and shock resistance

Vibration, sinusoidal	5 g (IEC 60068 -2 -6 Test Fc)
Shock, mechanical	50 g (IEC 60068 -2 -27 Test Ea)
Installation position	As required, preferably with actuator upright

1.) This information is part of the product key (see Product Enquiry Form at the end of this data sheet)

2.) Further port connections on request

3.) All values refer to a supply voltage of 24 V at 25 °C.

4.) Tube valve body (VP) also available with flange and threaded connections

5.) Depending on medium temperature, see chapter "Operating limits for ambient and medium temperature" on page 23

2. Approvals

Note:

If you need one of these certificates, please contact your Bürkert partner.

Approvals/ Conformity/ Certificate ^{1.)}	Description

7	Diaphragm	<ul style="list-style-type: none"> EPDM (AD) PTFE/EPDM (EA) Advanced PTFE/EPDM (EU) Gylon(R)/EPDM laminated (ER)
8	Valve body	See "1. General technical data" on page 3

3.4. Example of available membrane materials

The diaphragms have been developed to meet the unique challenges of hygienic and sterile requirements. Bürkert offers diaphragms with precise material composition and high accuracy. Bürkert diaphragms are available in a wide range of materials which have been tested and proven in applications in the food and beverage, biotechnology, pharmaceutical and cosmetics industries. The diaphragms are tested during development and production to ensure reliability under difficult process conditions.

- EPDM (AD)
- PTFE/EPDM (EA)
- advanced PTFE/EPDM (EU)
- Gylon®/EPDM laminated (ER)

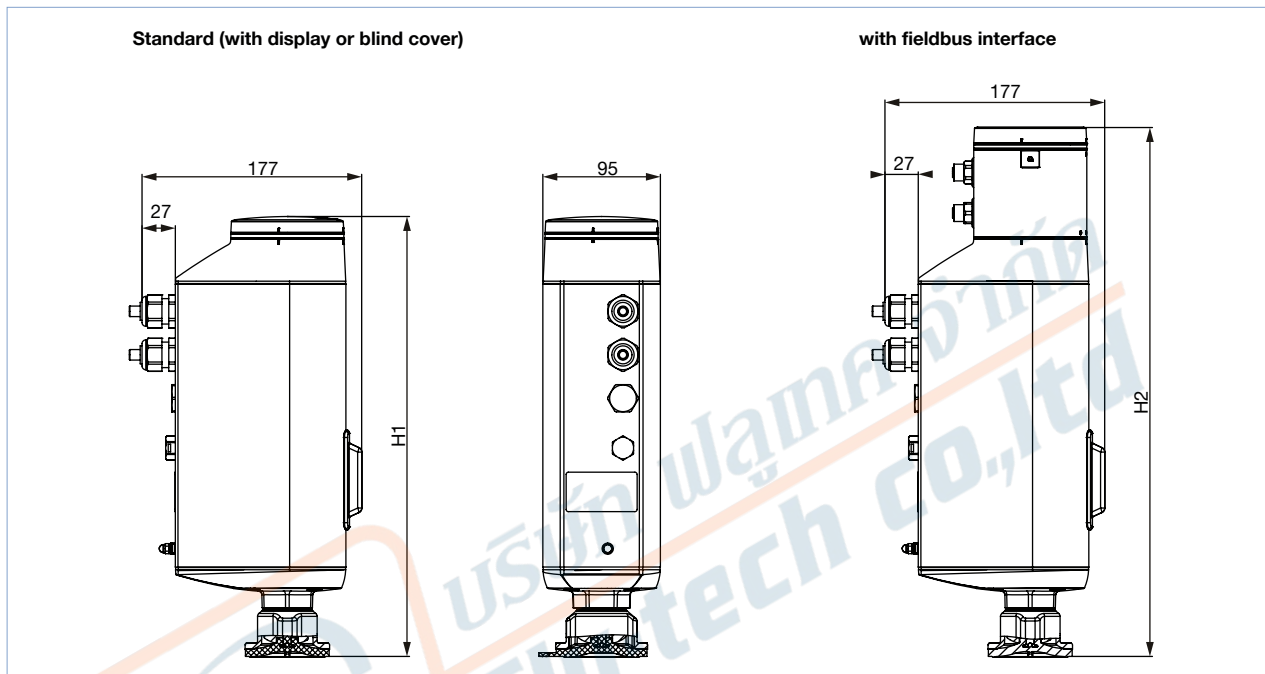

For further information please refer to our flyer "Diaphragm competence for hygienic applications" on our [website](#) ►.

5.2. Operating limits

Medium pressure

Diaphragm size DN	Max. operating pressure for seal material	
	EPDM, FKM [bar]	PTFE/EPDM, advanced PTFE/EPDM, GYLON®/EPDM laminated [bar]
8	10	10
15	10	10
20	10	10
25	10	10
32	8	5.5
40	4	2.5

Operating limits for ambient and medium temperature

The maximum permissible temperature for the environment and the medium are dependent on each other. The maximum allowable temperature curves of different device variants can be seen in the temperature chart.

DTS 1000303711 EN Version: M Status: RL (released | freigegeben | validé) printed: 01.06.2022

5.3. Electrical control and interfaces

Interface diagram

The position of the actuator is regulated according to the set-point position value. The set-point position value is specified either by an external standard signal (analogue) or via a field bus (digital).

Analogue control

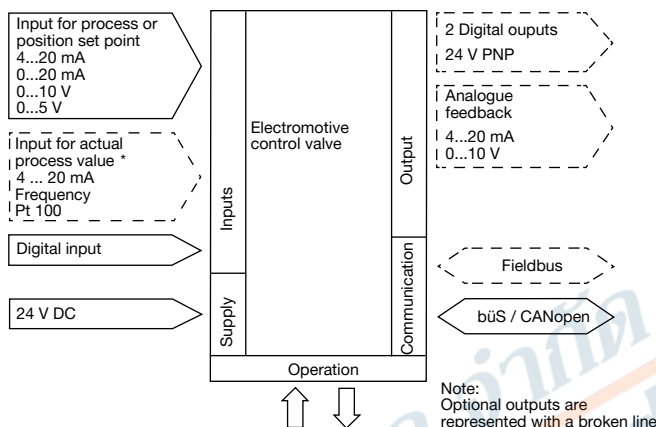

For analogue control 2 variants are available for the inputs and outputs and the connection interface

Inputs and outputs:

- 1 analogue input, 1 binary input
- 1 analogue input, 1 binary input, 1 analogue output, 2 binary output (option)
- 1 input for actual process value (for process controller version)

Interface:

- Cable gland with connection terminal
- M12 circular plug-in connectors (optional)

Control data	
Input setpoint analogue	Galvanically isolated from the supply voltage and analogue output 0/4...20 mA (input resistance 70 Ω) 0...5/10 V (input resistance 22 kΩ)
Output analogue	Max. current 10 mA (for voltage output 0...5/10 V) Load 0...800 Ω (for current output 0/4...20 mA)
Input digital	0...5 V = log "0", 10...30 V = log "1" inverted input reversed accordingly
Output digital	PNP, Current limitation 100 mA
Input actual value analogue (optional)	
4...20 mA	Input resistance: 80 Ω Resolution: 12 bit
Frequency	Measuring range: up to 1000 Hz Input resistance: >30 kΩ Resolution: 0.1 % of measurement value Input signal: >300 mVss Signal form: sine, rectangle, triangle
Pt 100	Measuring range: -20 °C...+220 °C Resolution: 0.01 °C Measurement current: 1 mA
Communication	
Communication interface (bUS)	Connection to PC via USB bUS interface set
Communication software (bUS)	Bürkert Communicator, see Type 8920 ▶

DTS 1000303711 EN Version: M Status: RL (released | freigegeben | valide) printed: 01.06.2022

6. Product design and assembly

6.1. Product features

Note

More detailed information can be found in the **operating instructions** ►.

<p>Operation</p>	
<p>Devices without display module: The basic functions are operated by 4 DIP switches and 2 push buttons. These are located under the blind cover which can be removed manually by turning. Through the būs service access, the device can also be configured in detail with the Bürkert Communicator software. For this, the optional USB-būs interface kit is required.</p>	<p style="text-align: right;">Blind cover dismantled</p>
<p>Rugged Touch Display (optional): The robust display module is easy to use, it configures and displays all the required functions. In addition to the start screen you can also switch to the configuration view and user-specified views as needed. All functions of the device without display module like būs service interface are available, too.</p>	
<p>Mechanical manual override: The manual override for mechanical movement of the valve is located under the blind cover or display module and ensures that the actuator can be operated even if the power supply fails.</p> <p>Electrical manual override: The electrical manual override for operation can be carried out directly on the touch display or, in the version without display, via two buttons under the blind cover.</p>	
<p>Display elements</p>	
<p>Display 360° LED light ring: A clearly visible 360° LED ring is attached to the blind cover or display module to indicate the device status, the valve end position and the operating status. The LED light ring lights up, blinks or flashes into one or changing colours, depending on the LED mode set.</p>	
<p>Mechanical position indicator: The mechanical position indicator shows the current valve position even if the supply voltage fails.</p>	
<p>Data transmission (optional)</p>	
<p>SIM card (optional): With the optionally available SIM card, device-specific values and user settings can be stored and quickly transferred to another device.</p>	<p style="text-align: right;">SIM card holder</p>

DTS 1000303711 EN Version: M Status: RL (released | freigegeben | validé) printed: 01.06.2022

Operation

büS service interface:

The büS service interface connects the device with the Communicator software on a PC, laptop or smartphone. From there a configuration of the device or an error diagnosis can be carried out.

büS service interface
Connection for CAN adapter or
USB-büS interface set

Safety position via energy storage (optional)

The safety starting positions in case of power interruption is realized with the optional energy storage SAFEPOS energy-pack. The desired position is set via the menu. In addition to the end positions (open/closed), any desired intermediate position can be defined here. The energy storage has a lifespan of up to 10 years, depending on the operating conditions. The power of the energy storage is monitored and a warning is displayed to indicate its life is coming to an end. The storage device is designed as a plug-in module to facilitate replacement. Without energy storage, the valve remains in the last position it was in. The energy storage device is fully charged and ready for operation after a maximum of 100 seconds (depending on the operating conditions). The energy storage device cannot be retrofitted in the field.

SAFEPOS
energy-pack

Fieldbus: EtherNet/IP, PROFINET, Modbus TCP (optional)

The fieldbus gateway for EtherNet/IP, PROFINET and Modbus TCP is integrated in an additional module. It has 2 fieldbus connections with 4 pin M12 circular sockets. The interfaces for the fieldbus connection and the status LEDs are located under the gateway housing cover. If there is a need for it to be include in a network then the configuration of the Ethernet can be performed via the web server. The gateway cannot be retrofitted in the field.

6.2. Product assembly

The electromotive linear actuator consists of a brushless direct current motor, gears and a threaded spindle. The valve spindle, which is connected to the threaded spindle, transfers the force to the diaphragm. The electronic control system is actuated either via standard signals (analogue) or via a field bus (digital). Available controller types are a position controller or a process controller. Optionally there is the energy pack (SAFEPOS energy-pack) for the device. If the supply voltage fails, the energy pack supplies the actuator with the required energy to move the valve into the required position which can be adjusted via a menu.

The valve position can be manually changed in 2 ways. Either over an electrical manual control or over mechanical manual control, if no supply voltage applied. The device can be set and operated either via 2 capacitive buttons and 4 DIP switches or optionally on a display with touch-screen. There is also the option of setting the device via the bus service interface and by using the PC software "Bürkert Communicator".

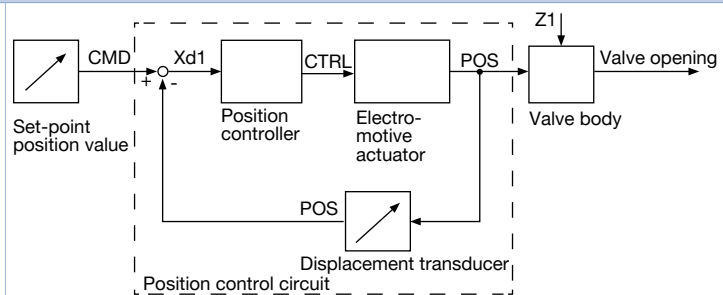

The intelligent process valve Type 3363 offers options for process monitoring, valve diagnostics and predictive maintenance. The state of the device is monitored and if necessary warnings or error messages for inadmissible environmental and operational conditions, disfunctional components or a critical state of the energy storage are displayed.

For a good diaphragm service life the actuator force is adjusted according to diaphragm size by default. It can even be adapted according to the operational conditions for an optimum diaphragm cycle life.

Integrated position controller

The position of the actuator (stroke) is controlled according to the position set-point. The position set-point is either given by an external standard signal (analogue) or via a fieldbus (digital). The displacement transducer records the actual position (POS) of the electric linear actuator. This actual position value is compared by the positioner with the position set-point (CMD) specified as standard signal. If there is a system deviation (Xd1), the electric motor drive is controlled via the manipulated variable CTRL and the actual position value is changed accordingly.

Integrated process controller (optional)

The additionally implemented PID controller allows process control. The set-point position of the valve is calculated from the external signal (e.g. level, pressure, flow rate, temperature) for the process set-point and the actual process value via the control parameters (PID controller).
