Type 8653 **AirLINE Field**

AirLINE Field - the valve island - optimised for process automation

- · Fieldbus interface CANopen, IO-Link or büS (Bürkert System Bus)
- Easy diagnostics by LC display
- Process reliability through pneumatic functions
- Optimised for installation in the field (IP65/67)

Can be combined with

AirLINE - the valve island optimised for process automation Type ME43

Fieldbus gateway

Type 2012 Pneumatically operated 2/2 way globe valve CLASSIC

Type 2100 ▶ Pneumatically operated 2/2 way angle seat valve ELEMENT for decentralized automation

Type 8920

Bürkert Communicator 3 MUNICATOR

Type 8697 Pneumatic control for decentralised automation of ELEMENT process valves

Product variants described in the data sheet may differ from the product presentation and description.

Type description

The valve island Type 8653 AirLINE Field has been especially developed for the requirements of process automation. New diagnostic functions can be visualised at the LC display, both in clear text as well as symbols. This makes it easy to relate to the shown messages and helps to save time during startup and maintenance. Furthermore the diagnostic message is also available at the control. This enables a fast overview of the plant status. The hardware structure is optimised for installation close to the actuator. An intelligent mounting system offers various installation solutions. Of course, it is also possible to fix the AirLINE Field to the top hat rail. Moreover, key pneumatic functions ensure increased process reliability. For instance, the non-return valves in the exhaust air ducts make sure there is no unplanned actuation due to pressure peaks.

1. General technical data

Product characteristics	
Dimensions	Detailed information can be found in chapter "4. Dimensions" on page 5.
Materials	
Body	PPA
Seal	NBR and PUR
Manual override	Available and lockable
Valve positions	4 valve positions (max. 8 valve functions)
Performance data	
Pressure data	Overpressure to atmospheric pressure
Pressure range	Vac. to 8 bar
External air supply	38 bar
Flow rate (Q_{Nn} value air)	310 l/min ^{1,)} Measurement at +20 $^\circ\text{C},$ 6 bar pressure at the valve inlet and 1 bar pressure difference
Switching times	Measured according to ISO 12238
Circuit functions	Detailed information can be found in chapter "2. Circuit functions" on page 4.
Electrical data	
Nominal power per valve	0.7 W (0.1 W after power reduction)
Nominal current per valve	29 mA (10 mA after power reduction)
Voltage/frequency	24 V DC
Voltage tolerance	±10%
Media data	
Media	Compressed air oiled, oil-free, dry; neutral gases (5 µm filter recommended)
Produktanschlüsse	
Working port	Plug-in coupling diameter 6 mm, D¼"
Air supply connection	Plug-in coupling diameter 8 mm, 5/16"
Environment and installation	
Ambient temperature	- 1 <mark>0</mark> °C+55 °C
Storage temperature	- 10 °C…+60 °C
Protection class	IP65/67
Zubehör	
Bürkert Software	Software Bürkert Communicator Detailed information can be found in chapter "7.1. Software Bürkert Communicator" of page 7.

1.) Maximum flow rate depending on the valve function – Detailed information can be found in chapter "8. Ordering information" on page 7.

7. Product accessories

7.1. Software Bürkert Communicator

Note:

To install the software, click here ▶.

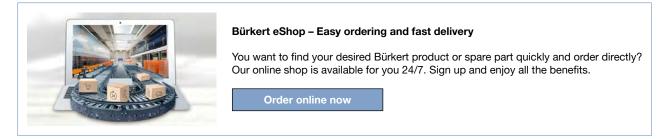

Part of Bürkert's new EDIP program (Efficient Device Integration Platform) is the Bürkert Communicator. This software can be run under MS-Windows and it is available on Bürkert's website for free. The Bürkert Communicator allows convenient system configuration and parametrisation of all connected field devices. An accessory part, the büS stick serves as the interface between computer and process instruments (see "Accessory for Software Bürkert Communicator" on page 12). It transfers "USB data" to "CAN data". The Communicator allows:

- Diagnosis
- Parametrization
- Registration and storage of process data ٠
- To watch graph of process
- To update firmware of the büS device connected

Feldbus-Gateway Type ME43

Note:

Please note that the ME43 Gateway modules are not factory configured. However, these must be configured in order to be used in a system. The device description files for the required protocols must be generated with the Communicator software before commissioning a system. For further details, please refer to the operating instructions for ME43.
