

Online Analysis System

Type description

in the software of the system.

up, as well as operation and maintenance.

- For analysis applications for drinking water and fresh water in industrial processes
 - Modular sensor and electronic system: – up to 6 measurements in one housing – up to 30 analysis sensor cubes in one Bürkert system bus (büS)
- Prepared for fielbus connectivity and remote access
- MEMS technologies allows minimal footprint and minimum sample water demand

Product variants described in the data sheet may differ from the product presentation and description.

Type 8905 Online Analysis System is a compact and modular system for

monitoring all important water parameters on one platform. It is a multichan-

The following parameters can be integrated into an online analysis system:

A modular system concept allows the measuring system to be assembled

according to customer requirements and enables simple installation and start-

For maintenance, sensors can be removed without tools, while the remaining

touch display or Bürkert Communicator. In addition to the display and storage of analysis parameters, other functions are possible, for example: programming of simple control algorithms using f(x), interventions in the process via

sensors continue to measure. The sensors are operated via an integrated 7"

analog and digital inputs and outputs, performing sensor calibrations.

Type 8905 is available as a compact system in one housing, as well as a customised system. For a system configuration please contact your Bürkert

pH, chlorine/chlorine dioxide, conductivity, ORP, turbidity, temperature.

nel measuring system for the Bürkert sensor cubes as well as other electronic modules from the EDIP platform. The efficient device integration platform (EDIP) allows a high flexibility by using modularity in the hardware as well as

Can be combined with

Type MS03 Conductivity Sensor Cube

Type MS04 ORP Sensor Cube

Type MS05Turbidity Sensor Cube

Type 8920Bürkert Communicator

Type ME2X System Control Unit

Type MZ20 Cleaning System

sales center.

Fluid Control Specialists

บริษัท ฟลูเทค จำกัด 845/3-4 หมู่ 3 ถ.เทพารักษ์ ต.เทพารักษ์ อ.เมือง จ.สมุทรปราการ 10270

1. General technical data

| Product properties | |
|--|--|
| Material | |
| Please make sure the device materials a | re compatible with the fluid you are using. Detailed information can be found in chapter |
| "2.1. Chemical Resistance Chart – Bü | rkert resistApp" on page 4. |
| Housing | PC (black, UV stabilized, UL94 V0) |
| Cover of the electronic module housing | PC (glass fibre reinforced, UV stabilized, UL94 V0, anthracite grey), PC (black, UV stabilized, UL94 V0) and glass |
| Cover of the sensor cube housing | PC (glass fibre reinforced, UV stabilized, UL94 V0, anthracite grey) and PC (transparent) |
| Studs | Stainless steel |
| Cable entry plate | Elastomer |
| Fluid connection | Biopolymer (EPDM seals) |
| Wall-mounting bracket | Stainless steel |
| Self-adhesive bumpers | Polyurethane |
| Dimensions | Detailed information can be found in chapter "3. Dimensions" on page 5. |
| Data memory or data-logger | Integrated Micro SD, 2 GB; adjustable logging interval; external reading via USB or LAN port |
| Display | 780 × 460 pixels resolution |
| | Capacitive 7" Touchscreen, backlit |
| Weight | Approx. 8 kg (if equipped with 1 × 100240 V AC power supply module + 1 x HMIU module + 5 sensor cubes) |
| | Up to 12 kg (if totally equipped) |
| Electrical data | |
| Operating voltage ("SUPPLY") | • 100240 V AC 50/60 Hz |
| | - current consumption at 100 V AC: 0.8 A |
| | - current consumption at 240 V AC: 0.8 A |
| Tec | Integrated protective fuse: a slow blow 2 A fuse. The fuse cannot be replaced an is integrated in the power supply. 2030 V DC, ±10% tolerance, filtered and regulated connection to main supply: permanent (through external SELV and LPS power supply) |
| Power consumption | Max. 96 VA |
| Medium data | |
| Fluid | Water without particles: drinking water, industrial water |
| Eluid pH range ^{1.)} | |
| Fluid conductivity | >50 µS/cm if there is no pH sensor cube |
| wol SP | >100 μS/cm if there is one pH sensor cube |
| Fluid temperature | +3 °C+40 °C (+37 °F+104 °F) |
| Fluid pressure | Refer to See data sheets of the sensor cubes and accessories, use the lowest pressure |
| Fluid flow rate | Min. flow rate: 6 l/h per installed sensor module, so with e.g. 3 sensor modules the min. flow rate is $6+6+6=18$ l/h due to parallel installation. |
| Process/Port connection & communic | cation |
| Sensor cubes | Max. 6 internal sensor cubes, max. 2 measurement water |
| | Max. connection of 30 external sensor cubes via Bürkert-Systembus (büS) |
| | Max. büS length 100 m (without T-connections) |
| Approvals and Certificates | |
| Standards | |
| Degree of protection acc. to IEC/EN 60529 | IP65 with closed and tight housings |
| Directives | |
| CE directives | The applied standards, which verify conformity with the EU Directives, can be found on the EU Type Examination Certificate and/or the EU Declaration of conformity (if applicable) |

4. Product design and assembly

4.1. Product assembly

Housing for the electric modules

The device is always equipped with the following electronic modules:

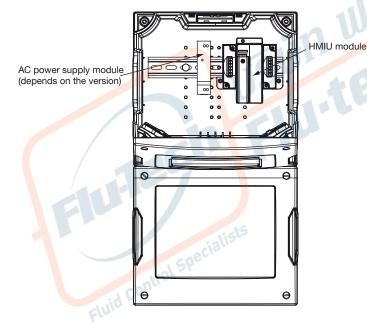

- HMIU (Human Machine Interface Unit) incl. USB slot and Ethernet connection •
- 7" touchscreen incl. USB slot
- Option: PSU mains supply 100...240 V AC .
- 2xbüS connector •

A total of 7 slots (5 for 230V/115V AC version) are available for electronic modules:

- Digital and analogue inputs and outputs •
- Fieldbus gateway ٠

The main housing parts for the electric modules are shown in the following drawing. Depending on the configuration of the device and for a complete description and for the technical data related to the electronic modules, refer to the data sheets of each electronic modules.

See data sheet Type ME2X > for more information.

Mechanical interfaces of the sensor cubes

All the fluidic backplanes for the sensor cubes have the same design. Thus any sensor cube can be plugged on any mechanical interface.

The backplanes are connected to each other and feed the sensor cubes parallel with the power supply, the sample water and serial büS connection.

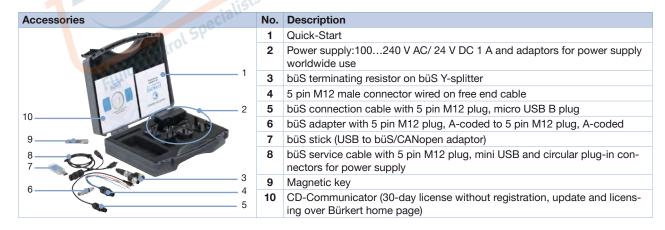

5. Product accessories

Note:

To set up a device without a display, please use the USB-büS interface, Type 8923 and the Bürkert Communicator Type 8920.

See Software manual Type 8920 > for more information.

6.2. Recommendation regarding product selection

The Online Analysis System Type 8905 is a compact and modular system in a single housing, offering a wide range of configuration possibilities.

Thank you for your interest in our products! In order to provide you with the best possible advice, please contact your local Bürkert branch office for customised system design.
