## **SERIES 350 2 Drop** Breathing Air Assembly

#### Model Shown: 350-4SA447

Master Pneumatic's breathing air assembly is designed to provide breathing air for up to 2 workers.

The general purpose filter in this assembly removes gross contaminants while the coalescing filter removes oil mists, aerosols and minute particles. The adsorbing filter effectively eliminates odors from freons, alchohols, esters, keytones and up to 99 percent of most hydrocarbons. The CO monitor is designed to detect and alert user to the presence of CO if the level is 10 ppm or greater as stated in OSHA title 29 section 1910.134(D)(1)&(2) ANSI/CGA standard G-7.1
