

5/2 way pulse or 5/3 way solenoid valve for pneumatic applications

- 11 mm width/station
- Compact design
- Block assembly
- Fast switching times

Product variants described in the data sheet may differ from the product presentation and description.

Type description

The pilot valve Type 0460 consists of a pilot control solenoid valve with double coil and pneumatic slide valve. The principle allows the switching of high pressures together with low power consumption and fast switching times. All valves are equipped with a manual override as a standard.
