

**SERIES PX MODULAR ELECTRONIC SYSTEM**

- **Maximum flexibility**
- **Digital and analogue I/O modules**
- **Stand alone solution connectable via SUB-D cable to all manifolds**
- **Manufactured in technopolymer**
- **Wide range of communication protocols**

**FLEXIBILITY IN A COMPACT SPACE**

Series PX modular electronic system has been designed to offer control and acquisition hardware for pneumatic and electric devices; it supports the most diffused communication protocols and can be configured with I/O modules, both digital and analog.

Series PX in stand alone version can be connected to every solenoid valves battery by using SUB-D connector, on the other hand Series PX can be directly connected to the following Pneumax solenoid valves series:

- Optyma S
- Optyma F
- Optyma T
- 2700
- 3000

Technopolymer bodies and sub-base and compact design has been studied to optimise room taken by the whole system, they make Serie PX extremely light and guarantee maximum flexibility.

The ability to quickly and easily configure the system, the range of modules and accessories available meet at the best the specific application needs of many industrial sectors.

Configurable on Cadenas platform

Electric connection	
C3	CANopen® node 64 IN - 64 OUT (32 fixed)
C4	CANopen® node 64 IN - 64 OUT (48 fixed)
P3	PROFIBUS DP node 64 IN - 64 OUT (32 fixed)
P4	PROFIBUS DP node 64 IN - 64 OUT (48 fixed)
I4	EtherNet/IP node 128 IN - 128 OUT (48 fixed)
A4	EtherCAT® node 128 IN - 128 OUT (48 fixed)
N4	PROFINET IO RT node 128 IN - 128 OUT (48 fixed)
K3	IO-Link protocol interface 64 IN - 64 OUT (32 fixed)
K4	IO-Link protocol interface 64 IN - 64 OUT (48 fixed)

Electric connection accessories	
	Without DIN rail adapter
G	With DIN rail adapter

Number of repetitions per module	
	Indicate the number of repetitions of the same module (no value for a single module)

Inputs module - Analogue / Digital (Optional)	
D8	8 M8 digital inputs module
D12	8 M12 digital inputs module
D3	32 digital inputs SUB-D 37 pins
T1	2 analogue inputs 0-5V module (voltage signal)
T2	2 analogue inputs 0-10V module (voltage signal)
T3	4 analogue inputs 0-5V module (voltage signal)
T4	4 analogue inputs 0-10V module (voltage signal)
C1	2 analogue inputs 0-20mA module (current signal)
C2	2 analogue inputs 4-20mA module (current signal)
C3	4 analogue inputs 0-20mA module (current signal)
C4	4 analogue inputs 4-20mA module (current signal)
P1	2 Pt100 2 wires inputs module
P2	2 Pt100 3 wires inputs module
P3	2 Pt100 4 wires inputs module
P4	4 Pt100 2 wires inputs module
P5	4 Pt100 3 wires inputs module
P6	4 Pt100 4 wires inputs module

Outputs module - Analogue / Digital (Optional)	
M8	8 M8 digital outputs module
M12	8 M12 digital outputs module
M3	32 digital outputs SUB-D 37 pins
V1	2 analogue outputs 0-5V module (voltage signal)
V2	2 analogue outputs 0-10V module (voltage signal)
V3	4 analogue outputs 0-5V module (voltage signal)
V4	4 analogue outputs 0-10V module (voltage signal)
L1	2 analogue outputs 0-20mA module (current signal)
L2	2 analogue outputs 4-20mA module (current signal)
L3	4 analogue outputs 0-20mA module (current signal)
L4	4 analogue outputs 4-20mA module (current signal)

Additional modules (Optional)	
P12	M12 additional power supply module

Module accessories	
	Without DIN rail adapter
G	With DIN rail adapter

Refer to the current limits indicated in the pages relating to the nodes / IO-Link interface

Configuration examples

**Example shown: PX3-P-N4-D8-V4-M3-D12**

Multiprotocol module with PROFINET IO RT protocol node, M8 digital input module, M8 analogue output module, 37 pin (SUB-D) digital output module and M12 digital input module.

**Example shown: PX3-P-G-A4-3D8-2M12**

Multiprotocol module with EtherCAT® protocol node, 3 M8 digital input modules and 2 M12 digital output modules; also includes DIN rail adaptors.

Overall dimensions

▶ Left endplate kit

Coding: 3100.KT.00

Weight 52 g

▶ Right endplate kit

Coding: 3100.KT.03

Weight 51 g

▶ DIN rail adapter

Coding: 3100.16

Weight 12 g

▶ Cable complete with connector, male 37 poles, IP65

Coding: 2400.37.M.Ⓛ.ⓐ

	CABLE LENGTH
Ⓛ	03 = 3 meters
	05 = 5 meters
	10 = 10 meters
	CONNECTOR
ⓐ	10 = In line
	90 = 90° Angle

1. Assemble the required modules starting with 3100.KT.03 right endplate kit.

2. Complete the assembly with the 3100.KT.00 left endplate kit.

3. To lock: rotate anticlockwise (in the direction of the LOCK print on the case).  
To unlock: rotate clockwise (in the direction of the UNLOCK print on the case).  
The same procedure shall be used to add or remove any module.

4. If required, assemble the DIN rail adapter using a 3 mm allen key.

A. For integration with a manifold it is necessary to remove the 3100.KT.03 right endplate kit.

B. Series PX modular electronic system can be integrated with the following valve manifold series:

- Optyma S
- Optyma F
- Optyma T
- 2700

The Series 3000 manifolds already integrates with the PX Series modules with dedicated fixing options.  
Please refer to [www.pneumaxspa.com](http://www.pneumaxspa.com) for more details.

## CANopen® protocol node kit

CANopen® node manages 64 inputs and outputs.

Accessory modules can be connected in whatever order and configuration.

Connection to CANopen® fieldbus is made via two M12, male and female, 5 pins, type A circular connectors, in parallel between them; connectors pinout is compliant to CiA Draft recommendation 303-1 (V. 1.3 : 30 December 2004).

Transmission speed and address, as well as termination resistor activation are set via DIP-switches.

CANopen® node is available in two versions with 32 or 48 outputs allocated to solenoid valves on the manifold directly connected to the node.

Such outputs correspond to least significant bytes and their allocation is independent of how many solenoid valves are installed.

Remaining outputs can be used to control the modules.

Byte allocation to additional modules is fully automatic.

### Current limitations

Both stand alone and integrated components must operate within the current limits of the fieldbus node; please note: the solenoid valves are supplied by OUTPUTS + 24 V DC (pin 4).

To compute the maximum current on the OUTPUTS + 24 V DC, please use the following formula:

$$I_{24\text{ V DC out}} = \sum_{i=1}^n I_{out,i} + m i_{EV}$$

$n$  = number of installed modules  
 $I_{out,i}$  = maximum total current absorbed by the i-th module on the OUTPUTS + 24 V DC supply rail (please see specifications of the single module)  
 $m$  = number of installed solenoid pilots  
 $i_{EV}$  = mean absorbed current per solenoid pilot (please see table below)

Series	$i_{EV}$
2200 "Optyma S"	36 mA
2500 "Optyma F"	54 mA
2500 "Optyma T"	54 mA

For each fieldbus node, maximum deliverable current by OUTPUTS + 24 V DC supply is 4 A, moreover the sum of the currents on OUTPUTS + 24 V DC and INPUTS + 24 V DC must not exceed 4 A.

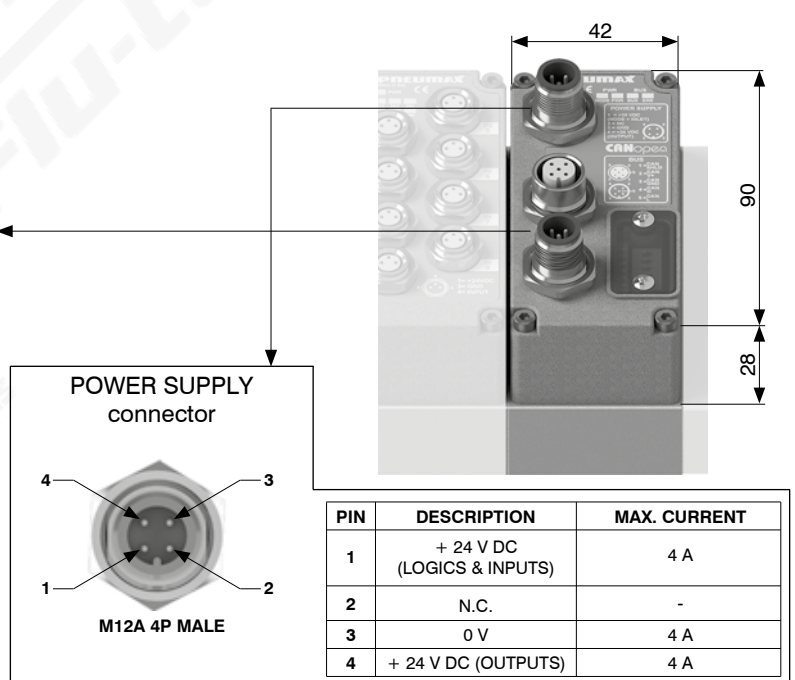

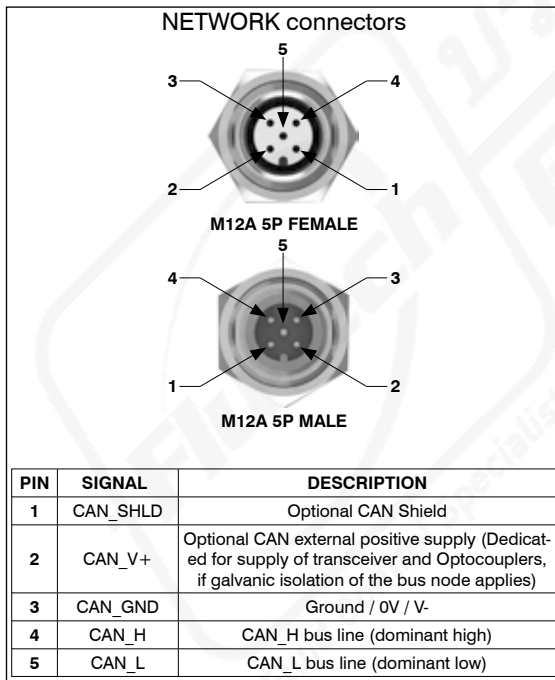

$$I_{24\text{ V DC out}} + I_{24\text{ V DC in}} < 4\text{ A}$$

Where:

$$I_{24\text{ V DC in}} = \sum_{i=1}^n I_{in,i}$$

$n$  = number of installed modules  
 $I_{in,i}$  = maximum total current absorbed by the i-th module on the INPUTS + 24 V DC supply rail (please see specifications of the single module)

**PROFIBUS DP protocol node kit**

PROFIBUS DP node manages 64 inputs and outputs.

Accessory modules can be connected in whatever order and configuration.

Connection to PROFIBUS DP fieldbus is made via two M12, male and female, 5 pins, type B circular connectors, in parallel between them; connectors pinout is PROFIBUS Interconnection Technology specifications compliant (Version 1.1, August 2001).

Address as well as termination resistor activation are set via DIP-switches.

PROFIBUS DP node is available in two versions with 32 or 48 outputs allocated to solenoid valves on the manifold directly connected to the node.

Such outputs correspond to least significant bytes and their allocation is independent of how many solenoid valves are installed.

Remaining outputs can be used to control the modules.

Byte allocation to additional modules is fully automatic.

Coding: K5330.64. PB

### 8 digital inputs module kit M8

M8 digital inputs module provides 8 M8, 3 pins, female connectors.

Inputs have PNP logic, + 24 V DC  $\pm$  10%.

It is possible to connect 2 wires devices (e.g. switches, magnetic limit switches, pressure switches, etc.) as well as 3 wires devices (e.g. proximity sensors, photocells, electronic magnetic limit switches, etc.).

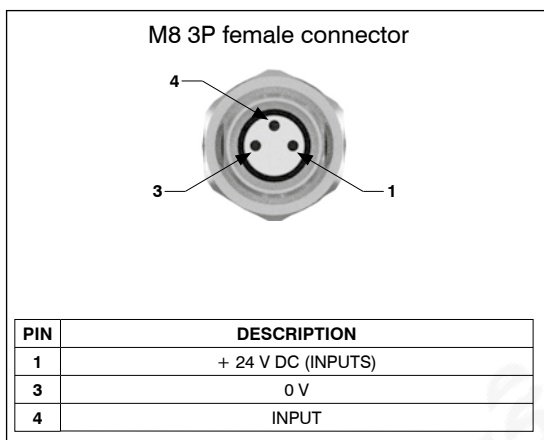

Inputs module power supply is provided by + 24 V DC power input on the serial system (type A, 4 pin M12 power connector, pin 1) or by K5030.M12 additional power supply module, in case it were installed upstream of the inputs module.

Coding: K5230.08.M8

Technical characteristics	
Maximum current per module	300 mA
Protection	Overcurrent (auto-resettable fuse) Reverse polarity
Input impedance	3 k $\Omega$
Maximum cable length	< 30 m
Input data allocation	8 bit
INPUTS + 24 V DC current consumption of the module only	5 mA

#### Scheme / Overall dimensions and I/O layout

### 8 digital inputs module kit M12

M12 digital inputs module provides 4 M12, 5 pins, female connectors.

Inputs have PNP logic, + 24 V DC  $\pm$  10%.

Every connector takes two input channels.

It is possible to connect 2 wires devices (e.g. switches, magnetic limit switches, pressure switches, etc.) as well as 3 wires devices (e.g. proximity sensors, photocells, electronic magnetic limit switches, etc.).

Inputs module power supply is provided by + 24 V DC power input on the serial system (type A, 4 pin M12 power connector, pin 1) or by K5030.M12 additional power supply module, in case it were installed upstream of the inputs module.

Coding: K5230.08.M12

Technical characteristics	
Maximum current per module	300 mA
Protection	Overcurrent (auto-resettable fuse) Reverse polarity
Input impedance	3k $\Omega$
Maximum cable length	< 30 m
Input data allocation	8 bit
INPUTS + 24 V DC current consumption of the module only	5 mA

#### Scheme / Overall dimensions and I/O layout

### 8 digital outputs module kit M8

M8 digital inputs module provides 8 M8, 3 pins, female connectors.

Outputs have PNP logic, + 24 V DC ± 10%.

Outputs module power supply is provided by + 24 V DC power input on the serial system (type A, 4 pins M12 power connector, pin 4) or by K5030.M12 additional power supply module, in case it were installed upstream of the outputs module.

Power supply presence is displayed by "PWR OUT" green LED light-on.

Each output has a LED indicator associated which lights up when output's signal status is high.

Coding: K5130.08.M8

#### Technical characteristics

Maximum current per output	100 mA
Protection	Short circuit (electronic), trigger at 2.8A
Maximum cable length	< 30 m
Output data allocation	8 bit
OUTPUTS + 24 V DC current consumption of the module only	15 mA

### 8 digital outputs module kit M12

M12 digital inputs module provides 4 M12, 5 pins, female connectors.

Outputs have PNP logic, + 24 V DC ± 10%.

Outputs module power supply is provided by + 24 V DC power input on the serial system (type A, 4 pins M12 power connector, pin 4) or by K5030.M12 additional power supply module, in case it were installed upstream of the outputs module.

Power supply presence is displayed by "PWR OUT" green LED light-on.

Each output has a LED indicator associated which lights up when output's signal status is high.

Coding: K5130.08.M12

#### Technical characteristics

Maximum current per output	100 mA
Protection	Short circuit (electronic), trigger at 2.8A
Maximum cable length	< 30 m
Output data allocation	8 bit
OUTPUTS + 24 V DC current consumption of the module only	15 mA

#### Scheme / Overall dimensions and I/O layout

### 32 digital inputs module kit (37 pins SUB-D connector)

The module provides a SUB-D 37 pins female connector.

Inputs have PNP logic, + 24 V DC  $\pm$  10%.

It is possible to connect 2 wires devices (e.g. switches, magnetic limit switches, pressure switches, etc.) as well as 3 wires devices (e.g. proximity sensors, photocells, electronic magnetic limit switches, etc.).

Inputs module power supply is provided by + 24 V DC power input on the serial system (type A, 4 pin M12 power connector, pin 1) or by K5030.M12 additional power supply module, in case it were installed upstream of the inputs module.

Coding: K5230.32.37P

Technical characteristics	
Maximum current per module	1 A
Protection	Overcurrent (auto-resettable fuse) Reverse polarity
Input impedance	3 k $\Omega$
Maximum cable length	< 30 m
Input data allocation	32 bit
INPUTS + 24 V DC current consumption of the module only	10 mA

**Analogue inputs module kit M8**

M8 analogue inputs module converts analogue signals into digital signals and transfers acquired data to field bus, via network node.

Inputs module power supply is provided by + 24 V DC power input on the serial system (type A, 4 pin M12 power connector, pin 1) or by K5030.M12 additional power supply module, in case it were installed upstream of the inputs module.

### Additional power supply module kit

Additional power supply module supplies additional electric power for downstream optional modules, where "downstream" means farther from serial node, **resetting the current limits of the network node / IO-Link interface.**

Electric connection of the module to external power supply unit occurs via an M12 4 pins type A male connector.

M12 connector has two different pins to power up logics and inputs (Pin 1) and outputs (Pin 4).

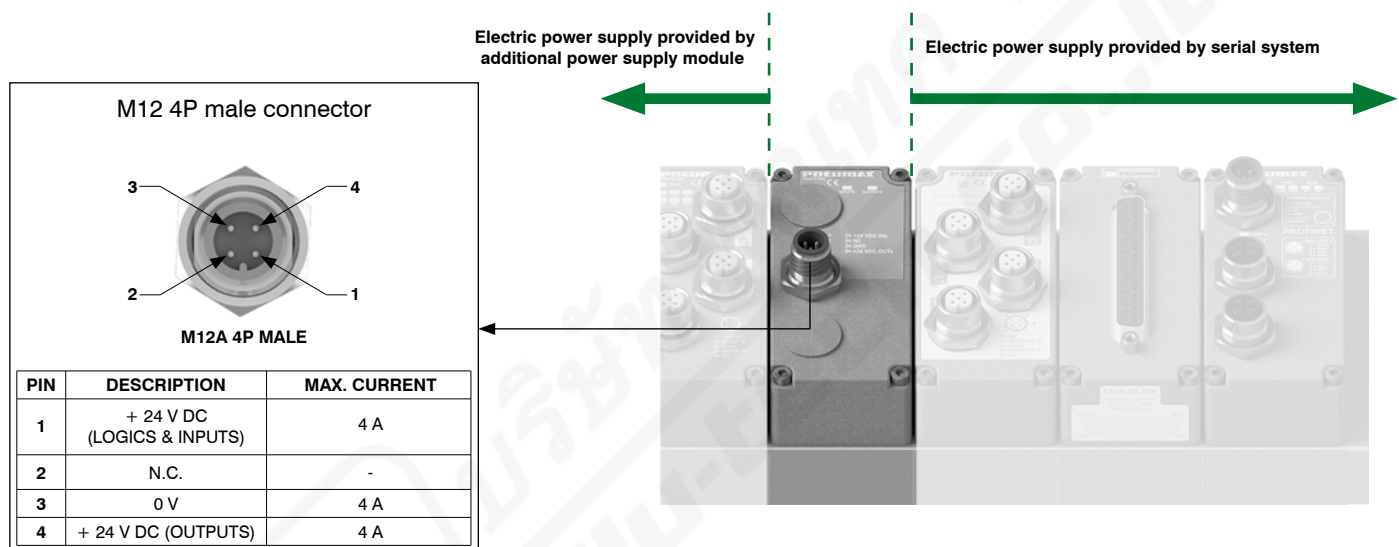

Presence of each power supply rail is indicated by corresponding green LED.

When using IO-Link interface, the additional power supply module is useful for separating the module power supplies of input from the output modules placed downstream.

Coding: K5030.M12
