

Electromotive 2/2-way diaphragm valve (ON/OFF)

- Safety position through energy storage
- Adjustable driving force
- Diagnostic functions and fieldbus connection
- Product wetted surfaces in Ra ≤ 0.38 µm...1.6 µm (optionally electropolished)
- Available in port connection sizes DN 06...DN 100

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type 3363 Electromotive 2-way diaphragm control valve	▶
	Type 3361 Electromotive 2-way globe control valve	▶
	Type 8098 FLOWave SAW flowmeter	▶

Type description

The externally controlled diaphragm valve Type 3323 consists of an electricaly controlled linear actuator (open/close), of a diaphragm and a 2/2-way valve housing. The electric actuator with recirculating ball screw ensures use under hygienic or aggressive environmental conditions. The flow-favorable and dead space-free valve housings enable high flow values and a wide range of possible uses. In the event of a power failure, the safety position is guaranteed by an optional energy storage device. The position is displayed by means of a 360° LED light ring. To protect the diaphragm the actuator has a drive force adjustment. A correspondingly high IP protection IP65/IP67 ensures adequate splash protection. The electromotive actuator of the diaphragm valve with ball screw moves to the desired end position at a particularly high speed up to 4 mm/s. In addition the valve is also equipped with a mechanical position indicator and a corresponding explosion protection ATEX/II 3G Ex ec IIC T4 Gc/II 3D Ex tc IIIC T135 °C Dc.

1. General technical data

Note:

- AG2: Actuator size 2 with a nominal force of 2500 N for diaphragm size 8...40
- AG3: Actuator size 3 with a nominal force of 11500 N for diaphragm size 40...100

Product properties	
Dimensions	Further information can be found in chapter "4. Dimensions" on page 8.
Material	
Forged body (VS) ¹⁾	Forged stainless steel 316L/1.4435/BN2, Fe <0.5 %/C ≤0.03 %
Stainless steel block material (VI etc.) ¹⁾	Stainless steel 316L/1.4435/BN2, etc.
Tube valve body (VP) ¹⁾	Stainless steel 316L/1.4435/BN2
Cast body (VG) ¹⁾	Cast stainless steel 316L/1.4435
Plastic body (PV, PD, PP) ¹⁾	PVC (PVC-U), PVDF, PP
Diaphragm	EPDM (AD) ¹⁾ , PTFE/EPDM (EA) ¹⁾ , advanced PTFE/EPDM (EU) ¹⁾ , Gylon®/EPDM laminated EPDM (ER) ¹⁾
Design	Diaphragm on/off valve
Diaphragm size	8...100, for plastic body 15...100
Standard surface quality²⁾	
Forged body (VS) ¹⁾	Internally electrically polished: Ra ≤0.38 µm (NO17) ¹⁾ (ASME BPE SF4/DIN HE4) (externally forged surface, electrically polished) Internally mechanically polished: Ra ≤0.5 µm (NO14) ¹⁾ (ASME BPE SF1) (externally forged surface)
Block body (VI etc.) ¹⁾	Internally electrically polished: Ra ≤0.38 µm (NO17) ¹⁾ (ASME BPE SF4/DIN HE4) (externally electrically polished) Internally mechanically polished: Ra ≤0.5 µm (NO14) ¹⁾ (ASME BPE SF1) (externally mechanically machined)
Tube valve body (VP) ¹⁾	Internally electrically polished: Ra ≤0.38 µm (NO17) ¹⁾ (ASME BPE SF4/DIN HE4) (externally electrically polished) Internally glass-bead blasted: Ra ≤1.6 µm (NO05) ¹⁾ (externally glass-bead blasted)
Cast body (VG) ¹⁾	Internally electrically polished: Ra ≤0.6 µm (NO16) ¹⁾ (ASME BPE SF6) (externally cast surface, electrically polished) Internally mechanically polished: Ra ≤0.76 µm (NO06) ¹⁾ (ASME BPE SF3/DIN H2) (externally cast surface)
Safety setting in case of power failure	With SAFEPOS energy-pack: opened, closed or freely programmable Without SAFEPOS energy-pack: blocked in last position
Lifelong energy storage SAFEPOS energy-pack	Up to 10 years (depending on operating conditions)
Performance data	
Closing time	AG2: 1.5...4.5 s AG3: 5.7...12.0 s (Depending on travel speed, stroke and operating conditions)
Travel speed	4 mm/s (for AG2 actuator force 2500 N) 3 mm/s (for AG3 actuator force 11500 N)
Electrical data	
Operating voltage	24 V DC ± 10 % (maximum residual ripple 10 %)
Operating current ³⁾	AG2: Max. 3 A (at maximum load and including 1 A charging current of the optional SAFEPOS energy-pack). At minimum operating temperature additionally 2 A AG3: Max. 5 A (at maximum load and including charging current of the optional SAFEPOS energy-pack). At minimum operating temperature additionally 6 A
Protection class (DIN EN 61140)	3
Duty cycle	100 %
Standby consumption ³⁾	1...5 W
Communication and control	
Digital input for position signal	0...5 V (log. 0) 10...30 V (log. 1)
Fieldbus (digital)	Bürkert system bus (bÜS) CANopen (option) EtherNet/IP, PROFINET, Modbus TCP (option via integrated gateway)

Medium data	
Process medium	Neutral gases and fluids, highly purified, sterile, aggressive or abrasive media (see chemical resistance chart ▶)
Medium temperature	
EPDM (AD) ^{1.)}	-10...+143 °C (steam sterilisation +150 °C for 60 min)
PTFE/EPDM (EA) ^{1.)}	-10...+130 °C (steam sterilisation +140 °C for 60 min)
Advanced PTFE/EPDM (EU) ^{1.)}	-5...+143 °C (steam sterilisation +150 °C for 60 min)
GYLON®/EPDM laminated EPDM (ER) ^{1.)}	-5...+130 °C (steam sterilisation +140 °C for 60 min)

3.4. Example of available membrane materials

The diaphragms have been developed to meet the unique challenges of hygienic and sterile requirements. Bürkert offers diaphragms with precise material composition and high accuracy. Bürkert diaphragms are available in a wide range of materials which have been tested and proven in applications in the food and beverage, biotechnology, pharmaceutical and cosmetics industries. The diaphragms are tested during development and production to ensure reliability under difficult process conditions.

- EPDM (AD)
- PTFE/EPDM (EA)
- Advanced PTFE/EPDM (EU)
- Gylon®/EPDM laminated EPDM (ER)

100	3.5	–	–

Operating limits for ambient and medium temperature

The maximum permissible temperature for the environment and the medium are depend on each other. The maximum allowable temperature curves of different device variants can be seen in the temperature chart.

Temperature diagram AG2

No.	Description
1	Units without module
2	Units with SAFEPOS energy-pack ^{1.)} or with fieldbus gateway

1.) The service life of the SAFEPOS energy-pack depends on the medium temperature and the ambient temperature.

Temperature diagram AG3

No.	Description
1	Units without module
2	Units with SAFEPOS energy-pack ^{1.)}
3	Units with fieldbus gateway

1.) The service life of the SAFEPOS energy-pack depends on the medium temperature and the ambient temperature.

Visit product website ▶

5.3. Electrical control and interfaces

Interface diagram

The position of the actuator is regulated according to the position setpoint. The position setpoint value is specified either by an external standard signal (digital) or via a field bus (digital).

Digital control

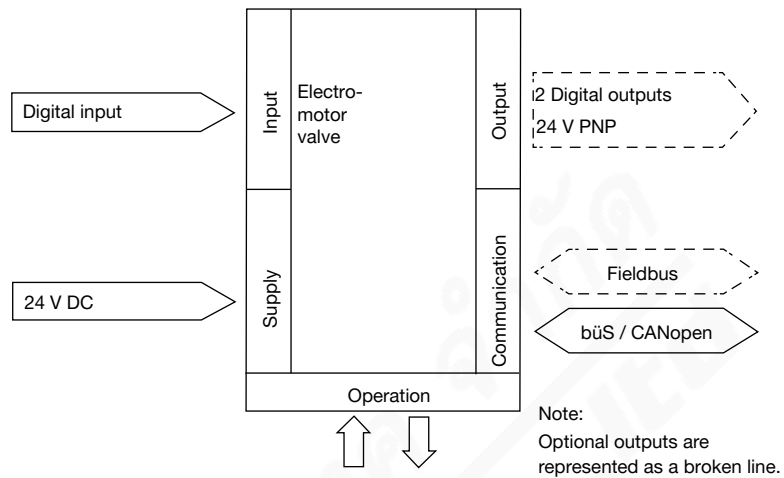

For digital control 2 variants are available for the inputs and outputs and the connection interface.

Inputs and outputs:

- 1 digital input, 2 digital outputs

Interface:

- Cable gland with connection terminal (AG2 only)
- Round connector M12 (option)

Control data	
Digital input	0...5 V = log "0", 10...30 V = log "1", inverted input reversed accordingly
Digital output (optional)	Current limitation 100 mA
Communication	
Communication interface (bûS)	Connection to PC via USB bûS interface set
Communication software (bûS)	Bürkert Communicator, see Type 8920 ▶

6. Product design and assembly

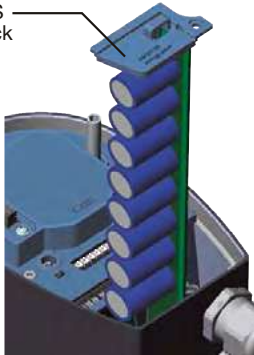

6.1. Product features

Note

Further information can be found in the **operating instructions Type 3323** ►.

<p>User interface</p> <p>Devices without display module: The basic functions are operated by 4 DIP switches and 2 push buttons. These are located under the blind cover which can be removed manually by turning. Through the būs service access, the device can also be configured in detail with the Bürkert Communicator software. For this, the optional USB-būs interface kit is required.</p>	<p>Blind cover dismantled</p>
<p>Actuation</p> <p>Mechanical manual override: The manual override for mechanical movement of the valve is located under the blind cover.</p> <p>Electrical manual override: Electrical manual override for the procedure is carried out directly on the touch screen, or in the version without a display by two buttons below the dummy cover.</p>	
<p>Display elements</p> <p>Display 360° LED light ring: A clearly visible 360° LED light ring is attached to the blind cover or display module to indicate the device status, the valve end position and the operating status. The LED light ring lights up, blinks or flashes into one or changing colours, depending on the LED mode set.</p> <p>Mechanical position indicator: The mechanical position indicator shows the current valve position even if the supply voltage fails.</p>	
<p>Data transmission (optional)</p> <p>SIM card (optional): With the optionally available SIM card, device-specific values and user settings can be stored and quickly transferred to another device.</p>	
<p>būs service interface: The būs service interface connects the device with the Bürkert communicator software on a PC, laptop or smartphone. This allows to carry out a configuration of the device or an error diagnosis.</p>	

DTS 1000303513 EN Version: R Status: RL (released | freigegeben | validé) printed: 19.09.2023

Safety position via energy storage (optional)	AG2	AG3
<p>The safety starting positions in case of power interruption is realized with the optional energy storage SAFEPOS energy-pack. The desired position is set via the menu. In addition to the end positions (open/closed), any desired intermediate position can be defined here. The energy storage has a lifespan of up to 10 years, depending on the operating conditions. The power of the energy storage is monitored and a warning is displayed to indicate its life is coming to an end. The storage device is designed as a plug-in module to facilitate replacement. Without energy storage, the valve remains in the last position it was in.</p> <p>The energy storage device is fully charged and ready for operation after a maximum of 120 seconds (depending on the operating conditions). The energy storage device cannot be retrofitted in the field.</p>	 <p>SAFEPOS energy-pack</p>	
Fieldbus: EtherNet/IP, PROFINET, Modbus TCP (optional)		
<p>The fieldbus gateway for EtherNet/IP, PROFINET and Modbus TCP is integrated in an additional module. It has 2 fieldbus connections with 4-pin M12 circular sockets. The interfaces for the fieldbus connection and the status LEDs are located under the gateway housing cover. Use the web server in order to integrate EtherNet users and configure access rights.</p> <p>The gateway cannot be retrofitted in the field.</p>	 <p>Fieldbus gateway</p> <p>Fieldbus M12 connection (2 Port Ethernet Switch)</p>	

DTS 1000303513 EN Version: R Status: RL (released | freigegeben | validé) printed: 19.09.2023

6.2. Product assembly

The electromotive linear actuator consists of a brushless direct current motor, gears and a threaded spindle. The valve spindle, which is connected to the threaded spindle, transfers the force to the diaphragm. The electronic control system is actuated either via a standard signal (digital) or via a fieldbus (digital). The energy pack (SAFEPOS energy-pack) is optionally available.. If the supply voltage fails, the energy pack supplies the actuator with the required energy to move the valves into the required position which can be adjusted via a menu.

The valve position can be manually changed in 2 ways. Either via an electrical manual control or via mechanical manual control, if no supply voltage is applied. The device can be set and operated either via 2 capacitive buttons is applied 4 DIP switches. There is also the option of setting the device via the bÜS service interface and by using the PC software Bürkert-Communicator.

The intelligent process valve Type 3323 offers options for process monitoring, valve diagnostics and predictive maintenance. The state of the device is monitored and, if necessary, warnings or error messages for inadmissible environmental and operational conditions, disfunctional components or a critical state of the energy storage are displayed.

For a good diaphragm service life the actuator force is adjusted according to diaphragm size by default. For an optimum diaphragm service life, it can also be adapted to the operational conditions..
