

Pneumatic control for decentralised automation of ELEMENT process valves

- Compact design
- Integrated pilot valve with manual override
- Integrated control air routing in the actuator
- Automatic adjustment of final position feedback
- With ATEX II cat. 3G/D and cat. 2G/D approval

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type 2100 ▶ Pneumatically operated 2/2-way angle seat valve ELEMENT for decentralised automation
	Type 2101 ▶ Pneumatically operated 2/2-way globe valve ELEMENT for decentralised automation
	Type 2103 ▶ 2/2-way diaphragm valve with pneumatic stainless steel actuator (Type ELEMENT) for decentralised automation
	Type 2106 ▶ Pneumatically operated 3/2 way seat valve ELEMENT for decentralized automation
	Type 2000 ▶ Pneumatically operated 2/2 way angle seat valve CLASSIC
	Type 2012 ▶ Pneumatically operated 2/2 way globe valve CLASSIC
	Type 2031 ▶ 2/2-way diaphragm valve with pneumatic plastic actuator (Type CLASSIC)

Type description

The pneumatic control unit Type 8697 is designed for decentralised automation of process valves ELEMENT Type 21xx. Mechanical or inductive limit switches register the valve position. The integrated pilot valve controls single-acting actuators. The design of the control unit and the actuator enables internal control air routing without external tubings. Besides the electrical position feedback the status of the device is shown directly on the pneumatic control unit itself via LEDs. The housing is easy to clean and features proven IP protection and chemically resistant materials for use in hygienic processing, in food, beverage and pharmaceutical industries. Combined with Bürkert ELEMENT actuators, the pneumatic actuating system enables spring chamber aeration that avoids actuator chamber contamination from the environment.

2. Approvals and conformities

2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available versions can be supplied with the below mentioned approvals or conformities.

2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

2.4. Explosion protection

6. Product installation

6.1. Combination options with pneumatic ELEMENT process valves

Note:

A decentralised, automated valve system consists of pneumatic control unit Type 8697 and an ELEMENT process valve Type 21xx.

The following information is required to select a complete system:

- Article no. of the desired pneumatic control unit Type 8697, see “Pneumatic control unit for decentralised automation of ELEMENT On/Off process valves Type 21xx” on page 13
- Article no. of the desired process valve Type 21xx, see data sheet Type 2100 ▶, Type 2101 ▶ and Type 2103 ▶

You order two components and receive a completely assembled and tested valve.

Example for decentralised automation of On/Off ELEMENT valve systems

DTS 1000215412 EN Version: U Status: RL (released | freigegeben | validé) printed: 08.11.2023

6.2. Combination options with pneumatic CLASSIC process valves

Note:

An **On/Off CLASSIC valve system** consists of an **electrical position feedback indicator Type 8697** and a **process valve Type 20xx CLASSIC**. The function of the position feedback indicator is solely to transmit the valve end position signals to the control system. The pneumatic control of the process valve is done by the valve island in the control cabinet, either centralized or distributed depending on the system design.

The following information is required to select a complete system:

- **Article no.** of the desired **electrical position feedback indicator Type 8697**, see [“Electrical position feedback for combination with centrally automated CLASSIC On/Off process valves Type 20xx” on page 14](#)
- **Article no.** of the selected **process valve Type 20xx**, see separate [data sheet Type 2000 ▶](#), [Type 2012 ▶](#) and [Type 2031 ▶](#)

You order two components and receive a completely assembled and tested valve.

Example for centralized/distributed automation of On/Off CLASSIC valve systems

The **On/Off CLASSIC valve system** can be combined with the **valve terminal Type 8640 ▶**, [Type 8644 ▶](#) or [Type 8650 ▶](#).
