

Electromotive 2-way diaphragm control valve

- Safety position through energy storage
- Adjustable driving force
- Diagnostics functions and fieldbus connection
- Wetted surfaces in Ra ≤ 0.38 µm...1.6 µm (optionally electropolished)
- Available in nominal diameters DN 06...DN 100

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type SV02 Diaphragms	▶
	Type ME61 EDIP process display	▶
	Type ME63 Industrial Ethernet gateway, IP65/ IP67/ IP69k	▶
	Type ME43 Fieldbus gateway	▶
	Type 8098 FLOWave SAW flowmeter	▶

Type description

The externally controlled Type 3363 diaphragm valve consists of an electrically controlled linear actuator (positioner), a diaphragm and a 2-way valve body. The electric actuator with ball screw ensures usage under hygienic or aggressive ambient conditions. The flow-optimised valve body with minimum dead space enables high flow values and a wide range of possible applications. An optional energy storage device guarantees the safety position in the event of a power failure. The position is indicated by means of a 360° LED light ring. The actuator has a drive force adjustment to protect the diaphragm. A correspondingly high IP protection IP65/IP67 ensures adequate splash protection. The electromotive actuator of the diaphragm valve with ball screw moves to the desired end position at a particularly high speed of up to 4 mm/s. Moreover, the valve is also equipped with a mechanical position indicator and corresponding explosion protection ATEX/ II 3G Ex ec IIC T4 Gc/II 3D Ex tc IIIC T135 °C Dc.

1. General technical data

Note:

- AG2: actuator size 2 with a nominal force of 2500 N for diaphragm size 8...40
- AG3: actuator size 3 with a nominal force of 11500 N for diaphragm size 40...100

Product properties	
Dimensions	Further information can be found in chapter "4. Dimensions" on page 10.
Material	
Forged steel valve body (VS) ¹⁾	Forged material 1.4435 according to BN2 DIN EN 10222-5, F316L according to ASTM A182/A182M and 316 I according to ASME BPE
Stainless steel block material (VI etc.) ¹⁾	Bloc material 1.4435 according to BN2 and 316L according to ASME BPE table DT-3
Tube valve body (VP) ¹⁾	Stainless steel tube 1.4435-BN2 / UNS S31603 (316L) according to DIN 11866, ASTM A269 / A270, DIN EN 10217-7 / 10216-5
Cast valve body (VG) ¹⁾	Investment cast material 1.4435 / 316 I
Design	Diaphragm control valve
Diaphragm	EPDM (AD) ¹⁾ , PTFE/EPDM (EA) ¹⁾ , Advanced PTFE/EPDM (EU) ¹⁾ , laminate of GYLON® and EPDM (ER) ¹⁾
Diaphragm size	8...100, for plastic body 15...100
Plastic body (PV, PD, PP) ¹⁾	PVC (PVC-U), PVDF, PP
Standard surface quality²⁾	
Forged steel valve body (VS) ¹⁾	Internally electrically polished: Ra ≤ 0.38 µm (NO17) ¹⁾ (ASME BPE SF4/DIN HE4) (externally forged surface, electrically polished) Internally mechanically polished: Ra ≤ 0.5 µm (NO14) ¹⁾ (ASME BPE SF1) (externally forged surface)
Stainless steel block material (VI etc.) ¹⁾	Internally electrically polished: Ra ≤ 0.38 µm (NO17) ¹⁾ (ASME BPE SF4/DIN HE4) (externally electrically polished) Internally mechanically polished: Ra ≤ 0.5 µm (NO14) ¹⁾ (ASME BPE SF1) (externally mechanically machined)
Tube valve body (VP) ¹⁾	Internally electrically polished: Ra ≤ 0.38 µm (NO17) ¹⁾ (ASME BPE SF4/DIN HE4) (externally electrically polished) Internally glass-bead blasted: Ra ≤ 1.6 µm (NO05) ¹⁾ (externally glass-bead blasted)
Cast valve body (VG) ¹⁾	Internally electrically polished: Ra ≤ 0.6 µm (NO16) ¹⁾ (ASME BPE SF6) ³⁾ (externally cast surface, electrically polished) ³⁾ Internally mechanically polished: Ra ≤ 0.76 µm (NO06) ¹⁾ (ASME BPE SF3/DIN H2) (externally cast surface)
Safety setting in case of power failure	With energy storage SAFEPOS energy-pack: open, closed or freely programmable Without energy storage SAFEPOS energy-pack: blocked in last position
Service life of energy storage SAFEPOS energy-pack	Up to 10 years (depending on operating conditions)
Controller variant	Positioner or process controller (option)
Performance data	
Closing time	AG2: 1.5...4.5 s AG3: 5.7...12.0 s (Depending on travel speed, stroke and operating conditions)
Travel speed	4 mm/s (for AG2 actuator force 2500 N) 3 mm/s (for AG3 actuator force 11500 N)
Dead band of the positioner	± 0.4 %

Electrical data	
Operating voltage	24 V DC \pm 10 % (maximum residual ripple 10 %)
Operating current ^{4.)}	AG2: maximum 3 A (at maximum load and including 1 A charging current of the optional energy storage SAFEPOS energy-pack). At minimum operating temperature additionally 2 A AG3: maximum 5 A (at maximum load and including charging current of the optional energy storage SAFEPOS energy-pack). At minimum operating temperature additionally 6 A
Protection class (DIN EN 61140)	III
Duty cycle	100 %
Standby consumption ^{4.)}	1...5 W
Communication and control	
Standard signal (analogue)	Set-point value: 0/4...20 mA, 0...5/10 V and binary input (further inputs and outputs optional (see "5.3. Electrical control and interfaces" on page 30)
Fieldbus (digital)	Bürkert system bus (bÜS) CANopen (option) EtherNet/IP, PROFINET, Modbus TCP (option via integrated gateway)
Medium data	
Process medium	Neutral gases and fluids, highly purified, sterile, aggressive or abrasive mediums (see chemical resistance chart ▶)
Medium temperature	
EPDM (AD) ^{1.)}	-10...+143 °C (steam sterilisation +150 °C for 60 min)
PTFE/EPDM (EA) ^{1.)}	-10...+130 °C (steam sterilisation +140 °C for 60 min)
Advanced PTFE/EPDM (EU) ^{1.)}	-5...+143 °C (steam sterilisation +150 °C for 60 min)
Laminate of GYLON® and EPDM (ER) ^{1.)}	-5...+130 °C (steam sterilisation +140 °C for 60 min)
Plastic body	See "3.2. Pressure temperature diagram for plastic body" on page 8
Process/Port connection & communication	
Nominal diameter (port connection)	DN 06...DN 100 (1/8" ... 4")
Port connection ^{2.)}	
For stainless steel body^{5.)}	
Welded connection ^{2.)}	DIN EN ISO 1127 / ISO 4200 / DIN 11866 series B DIN 11850-2 / DIN 11866 series A / DIN EN 10357 series A ASME BPE / DIN 11866 series C
Clamp connection ^{2.)}	DIN 32676 series A (DIN pipe) DIN 32676 series B (ISO pipe) ASME BPE
For plastic body	
Spigot connection	DN 15...DN 50
True union	DN 15...DN 50
Loose flange	DN 15...DN 65
Fixed flange	DN 80...DN 100
Electrical connection	
Actuator	Terminal strip with cable gland (only AG2), 2 x M20 or 2 x M12 circular plugs, 5-pin and 8-pin
Fieldbus gateway	2 x M12 circular sockets, 4-pin (only with Industrial Ethernet)
Approvals and conformities	
Further information can be found in chapter "2. Approvals and conformities" on page 6.	
Detergent resistance	According to Ecolab test method: R&D/P3-E No. 40-1
Environment and installation	
Ambient temperature	-10 °C...+65 °C ^{6.)} (without display) -10 °C...+60 °C ^{6.)} (with display) -10 °C...+55 °C ^{6.)} (with energy storage SAFEPOS energy-pack) Derating see "5.2. Operating limits" on page 27
Degree of protection	IP65/IP67 (DIN EN 60529), NEMA 4X
Installation position	As required, preferably with actuator upright

1.) This information is part of the product key (see "7.3. Bürkert Product Enquiry Form" on page 36).

2.) Other port connections are available on request.

3.) Only up to DN 50, not available for DN 65...100

3.) All values relate to a supply voltage of 24 V at +25 °C.

5.) Tube valve body (VP) also available with flange and threaded connections

6.) Depends on medium temperature, see chapter "Operating limits for ambient and medium temperature" on page 28

2. Approvals and conformities

2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available versions can be supplied with the below mentioned approvals or conformities.

2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

2.4. Explosion protection

Approval	Description
 	<p>Optional: Explosion protection (valid for the variable code PX48) As a category 3 device suitable for zone 2/22.</p> <p>ATEX: BVS 17 ATEX E 117 X II 3G Ex ec IIC T4 Gc II 3D Ex tc IIIC T135 °C Dc</p> <p>IECEX: IECEX BVS 17.0100X Ex ec IIC T4 Gc Ex tc IIIC T135 °C Dc</p>

2.5. North America (USA/Canada)

Approval	Description
	<p>Optional: Actuators UL Listed for the USA and Canada (valid for the variable code PU11) The actuators are UL Listed for the USA and Canada according to:</p> <ul style="list-style-type: none"> • UL 61010-1 (ELECTRICAL EQUIPMENT FOR MEASUREMENT, CONTROL, AND LABORATORY USE – Part 1: General Requirements) • CAN/CSA-C22.2 No. 61010-1

2.6. Foods and beverages/Hygiene

Conformity	Description
	<p>3-A Sanitary Standards Inc. (valid for the variable code PE05) The products comply with 3-A Sanitary Standards Inc (3-A SSI) as per certificate.</p>
<p>FDA</p>	<p>FDA – Code of Federal Regulations The diaphragms made of EPDM (AD), PTFE/EPDM (EA), Advanced PTFE/EPDM (EU) and laminate of GYLON® and EPDM (ER) comply with the Code of Federal Regulations published by the FDA (Food and Drug Administration, USA).</p>
<p>USP</p>	<p>United States Pharmacopeial Convention (USP) The diaphragms made of EPDM (AD), PTFE/EPDM (EA), Advanced PTFE/EPDM (EU) and laminate of GYLON® and EPDM (ER) are tested according to USP Class VI.</p>
	<p>EC Regulation 1935/2004 of the European Parliament and of the Council The diaphragms made of EPDM (AD), PTFE/EPDM (EA), Advanced PTFE/EPDM (EU) and laminate of GYLON® and EPDM (ER) are suitable for use with food and beverages (according to EC Regulation 1935/2004/EC).</p>

3.4. Example of available membrane materials

The diaphragms have been developed to meet the unique challenges of hygienic and sterile requirements. Bürkert offers diaphragms with precise material composition and high accuracy. Bürkert diaphragms are available in a wide range of materials which have been tested and proven in applications in the food and beverage, biotechnology, pharmaceutical and cosmetics industries. The diaphragms are tested during development and production to ensure reliability under difficult process conditions.

- EPDM (AD)
- PTFE/EPDM (EA)
- Advanced PTFE/EPDM (EU)
- Laminate of GYLON® and EPDM (ER)

For further information please refer to our flyer "Diaphragm competence for hygienic applications" on our [website](#) ►.

100	3.5	–	–

Operating limits for ambient and medium temperature

The maximum permissible temperature for the environment and the medium depend on each other. The maximum allowable temperature curves of different device variants are shown in the temperature chart.

Temperature diagram AG2

No.	Description
1	Devices without module
2	Devices with display
3	Devices with energy storage SAFEPOS energy-pack or fieldbus gateway, with/without display module

1.) The service life of the energy storage SAFEPOS energy-pack depends on the medium temperature and the ambient temperature.

DTS 1000303711 EN Version: P Status: RL (released | freigegeben | validé) printed: 19.06.2024

Temperature diagram AG3

No.	Description
1	Devices without module
2	Devices with energy storage SAFEPOS energy-pack
3	Devices with display module with/without energy storage SAFEPOS energy-pack
4	Devices with fieldbus gateway with/without display module with/without energy storage SAFEPOS energy-pack

1.) The service life of the energy storage SAFEPOS energy-pack depends on the medium temperature and the ambient temperature.

5.3. Electrical control and interfaces

Interface diagram

The position of the actuator is regulated according to the position set-point value. The position set-point value is specified either by an external standard signal (analogue) or via a fieldbus (digital).

Analogue control

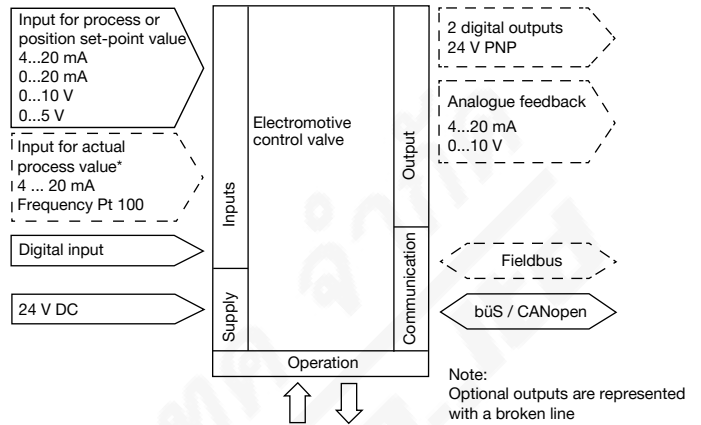

For analogue control, 2 variants are available for each the inputs and outputs and the connection interface.

Inputs and outputs:

- 1 analogue input, 1 binary input
- 1 analogue input, 1 binary input, 1 analogue output, 2 binary output (option)
- 1 input for actual process value (for process controller variant)

Interface:

- Cable gland with connection terminal (only AG2)
- M12 circular plug-in connectors (optional)

Control data	
Analogue input set-point value	Galvanically isolated from the supply voltage and analogue output 0/4...20 mA (input resistance 70 Ω) 0...5/10 V (input resistance 22 kΩ)
Analogue output	Maximum current 10 mA (for voltage output 0...5/10 V) Load 0...800 Ω (for current output 0/4...20 mA)
Digital input	0...5 V = log "0", 10...30 V = log "1", inverted input reversed accordingly
Digital output	PNP, current limitation 100 mA
Analogue input actual value (optional)	
4...20 mA	Input resistance: 80 Ω Resolution: 12 bit
Frequency	Measuring range: up to 1000 Hz Input resistance: >30 kΩ Resolution: 0.1 % of measurement value Input signal: >300 mVss Signal form: sine, rectangle, triangle
Pt 100	Measuring range: -20 °C...+220 °C Resolution: 0.01 °C Measurement current: 1 mA
Communication	
Communication interface (bÜS)	Connection to PC via USB bÜS interface set
Communication software (bÜS)	Bürkert Communicator, see Type 8920 ▶

DTS 1000303711 EN Version: P Status: RL (released | freigegeben | validé) printed: 19.06.2024

6. Product design and assembly

6.1. Product features

Note

Further information can be found in the **operating instructions Type 3363** ▶.

User interface	
<p>Device without display module</p> <p>The basic functions are operated by 4 DIP switches and 2 push buttons. These are located under the blind cover which can be removed manually by turning. Through the bÜS service access, the device can also be configured in detail with the Bürkert communicator software.</p> <p>For this, the optional USB-bÜS interface kit is required (see "7.4. Ordering chart accessories" on page 37).</p>	<p style="text-align: right;">Blind cover dismantled</p> <p>1.) Non-functional in devices with display module. The display must be used for operation!</p>
<p>Device with display module</p> <p>The robust display module is easy to use, it configures and displays all the required functions. In addition to the start screen you can also switch to the configuration view and user-specified views as needed. All functions of the device without display module like bÜS service interface are available, too.</p>	
Actuation	
<p>Mechanical manual control</p> <p>The manual override for mechanical movement of the valve is located for AG2 under the blind cover or display module and for AG3 under the pressure compensation element. It ensures that the actuator can be operated even if the power supply fails.</p>	
<p>Electrical control via operating elements</p> <p>The electrical manual override for the procedure is carried out via two buttons under the blind cover.</p>	

DTS 1000303711 EN Version: P Status: RL (released | freigegeben | valide) printed: 19.06.2024

<p>Display elements</p>		
<p>Display 360° LED light ring A clearly visible 360° LED ring is attached to the blind cover or display module to indicate the device status, the valve end position and the operating status. The LED light ring lights up, blinks or flashes into one or changing colours, depending on the LED mode set.</p> <p>Mechanical position indicator: The mechanical position indicator shows the current valve position even if the supply voltage fails.</p>		
<p>Data transmission (optional)</p>		
<p>SIM card (optional) With the optionally available SIM card, device-specific values and user settings can be stored and quickly transferred to another device.</p>		
<p>büS service interface The büS service interface connects the device with the Bürkert Communicator software on a PC, laptop or smartphone. From there a configuration of the device or error diagnosis can be carried out.</p>		
<p>Safety position via energy storage (optional)</p>		
<p>The safety starting positions in case of power interruption is realised with the optional energy storage SAFEPOS energy-pack. The desired position is set via the menu. In addition to the end positions (open/closed), any desired intermediate position can be defined here. The energy storage has a lifespan of up to 10 years, depending on the operating conditions. The power of the energy storage is monitored and a warning is displayed to indicate its service life coming to an end. The storage device is designed as a plug-in module to facilitate replacement. Without energy storage, the valve remains in the last position it was in.</p> <p>The energy storage device is fully charged and ready for operation after a maximum of 120 seconds (depending on the operating conditions).</p> <p>The energy storage device cannot be retrofitted in the field.</p>	<p>AG2</p>	<p>AG3</p>

DTS 1000303711 EN Version: P Status: RL (released | freigegeben | valide) printed: 19.06.2024

Fieldbus: EtherNet/IP, PROFINET, Modbus TCP (optional)

The fieldbus gateway for EtherNet/IP, PROFINET and Modbus TCP is integrated in an additional module. It has 2 fieldbus connections with 4-pin M12 circular sockets. The interfaces for the fieldbus connection and the status LEDs are located under the gateway housing cover. If there is a need for it to be included in a network, the Ethernet configuration can be performed via the web server.

The gateway cannot be retrofitted in the field.

DTS 1000303711 EN Version: P Status: RL (released | freigegeben | valide) printed: 19.06.2024

6.2. Product assembly

The electromotive linear drive consists of a brushless DC motor, a gear and a spindle system that transfers the force to the closing element. The integrated control electronics are controlled either by standard signals or via a fieldbus (digital). A positioner and a process controller are available as controller variants. The electromotive linear actuator is designed to provide optimum efficiency. At the same time, it keeps the valve tight and in position even at the maximum specified medium pressure in a powerless standstill. The optional energy storage device SAFEPOS energy-pack is available for the device. If the supply voltage fails, it supplies the actuator with the energy required to move the valve into the desired position which can be set in the menu.

The valve position can be changed manually in 2 ways. Either via the electrical manual control or via a mechanical manual control if no supply voltage is available. The device can be set and operated either via 2 capacitive keys and 4 DIP switches or optionally on a display with touch screen. Additionally, you can always operate the device via the bÜS service interface and using the software Bürkert Communicator.

The intelligent process valve Type 3363 offers the operator options for process monitoring, valve diagnosis and preventive maintenance. Internal measurements of the operating status are evaluated and, if necessary, issued as a warning or error message. These signal, for example, impermissible ambient and process conditions, functional deviations of components or the status of the energy storage device. A special feature of the globe control valve is the screwed-in valve seat which can be replaced to reduce the seat size.

To increase diaphragm service life, the drive force is adapted to the diaphragm size. It can also be adapted to the operating conditions to achieve optimum service life.

Structure of electromotive diaphragm valve Type 3363 AG2

DTS 1000303711 EN Version: P Status: RL (released | freigegeben | valide) printed: 19.06.2024

Structure of electromotive diaphragm valve Type 3363 AG3

Integrated position controller	
<p>The position of the actuator (stroke) is controlled according to the position set-point. The position set-point is either given by an external standard signal (analogue) or via a fieldbus (digital). The displacement transducer records the actual position (POS) of the electric linear actuator. The positioner compares the actual position value with the position set-point (CMD) specified as standard signal. If there is a system deviation (Xd1), the electric motor drive is controlled via the actuating variable CTRL and the actual position value is changed accordingly.</p>	
Integrated process controller (optional)	
<p>The additionally implemented PID controller allows process control. The set-point position of the valve is calculated from the external signal (e.g. level, pressure, flow rate, temperature) for the process set-point and the actual process value via the control parameters (PID controller).</p>
