ALSONIC-FX2
Ultrasonic Flowmeter
ALSONIC SERIES

GENERAL

THE SMARTMEASURERMENT ALSONICFX2 is a fixed-mount, transit-time ultrasonic flow and BTU meter, with clamp-on transducers for non-invasive liquid flow measurement. Our microprocessor based, user friendly, field programmable flow and energy measurement technique creates no interruption of the process flow and provides for all installation costs. For BTU/Energy applications both clamp-on and insertion RTDs are available.

FEATURES

■ MEASURING PRINCIPLE

The ultrasonic signal from the transducer is transmitted and received through the moving liquid. The difference between the upstream and downstream transit time, is directly proportional to Fluid Velocity, used to calculate flow rate and velocity.
