

Radar filling level meter for liquids and bulk solids

- Suitable for simple applications such as water treatment, storage tanks and small silos
- Continuous filling level measurement up to 20 m, 4...20 mA, 2-wire
- Available process connections: thread (G, NPT, R 1½")
- Excellent radar signal focusing and high measurement dynamics
- Adjustable via Bluetooth

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

| | | |
|---|---|---|
|  | Type 8619 multiCELL – multi-channel/ multi-function transmitter/ controller | ▶ |
|  | Type 8692 Digital electro-pneumatic positioner for integrated mounting on process control valves | ▶ |
|  | Type 8647 AirLINE SP – electropneu- matic automation system | ▶ |
|  | Type ME44 I/O module, IP 20 | ▶ |

Type description

The device Type 8131 is a non-contact radar level meter, ideal for continuous level measurement of liquids and bulk solids in basic applications. It is particularly suitable for storage tanks, water treatment applications (open channel measurement) as well as through plastic tanks. For solids, it can be used in small silos or open tanks.

The radar level meter, available in 1½" with G, NPT or R connection, is equipped with a plastic housing and a plastic integrated antenna.

The excellent focus of the radar signal and the high measurement dynamics allow excellent measurement results even in small, narrow and high containers, as the risk of signal interference by installations, constructions and vessel walls is significantly reduced. Signal damping, e.g. due to signal length, foaming or low dielectric constant values of liquids, becomes much less important.

| Antenna | PVDF |
| Seal ¹⁾ | FKM, EPDM |

Dimensions Further information can be found in chapter [“4. Dimensions” on page 8.](#)

Weight Approx. 0.7 kg

Measured quantity Distance between the end of the sensor antenna and the product surface. The edge of the antenna is also the measurement reference level.

Beam angle²⁾ 8°

Measuring range

- 0...10 m depending on application and medium (recommended measuring range 0...5 m with bulk solids)
- 0...20 m depending on application and medium (recommended measuring range 0...10 m with bulk solids)

Damping (63 % of the input variable) 0...999 s, adjustable

Operating mode The configurable operating mode depends on the country in which the device is used.

- Mode 1: EU, Albania, Andorra, Azerbaijan, Australia, Belarus, Bosnia and Herzegovina, Canada, Liechtenstein, Moldavia, Monaco, Montenegro, New Zealand, Northern Macedonia, Norway, San Marino, Saudi Arabia, Serbia, South-Africa, Switzerland, Turkey, Ukraine, United Kingdom, USA
- Mode 2: South Korea, Taiwan, Thailand
- Mode 3: India, Malaysia
- Mode 4: Russia, Kazakhstan

Performance data

Blocking distance Depending on the operating conditions

- Operating mode 1, 2 and 4: 0 mm
- Operating mode 3: ≥ 250 mm

Measuring range resolution 1 mm

Measurement deviation According to EN 60770-1

- Variant 0...10 m: ≤ 5 mm for liquids (measuring distance > 0.25 m)
- Variant 0...20 m: ≤ 2 mm for liquids (measuring distance > 0.25 m)

Further information can be found in chapter [“5.1. Measurement deviation diagram” on page 9.](#)

Non-repeatability³⁾

- Variant 0...10 m: ≤ 5 mm
- Variant 0...20 m: ≤ 2 mm

Measuring frequency W-Band (80 GHz technology)

Measuring cycle time⁴⁾ ≤ 250 ms

Step response time^{4) 5)} ≤ 3 s

Temperature drift $< 0.03\%/10K$ or max. 0.3 % related to the 16.7 mA span

2. Approvals and conformities

2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available versions can be supplied with the below mentioned approvals or conformities.

2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

2.4. Explosion protection

| Approval | Description |
|---|---|
|   | <p>Optional: Explosion protection¹⁾ Ex marking of the components according to:</p> <p>ATEX: KIWA 19ATEX0028X</p> <ul style="list-style-type: none"> • II 1G, 1/2G Ex ia IIC T4 Ga, Ga/Gb <p>IECEx: IECEx KIWA 19.0015X</p> <ul style="list-style-type: none"> • Ex ia IIC T4...T1 Ga or Ga/Gb <p>UKEx: UL21UKEX2284X Rev. 1</p> <ul style="list-style-type: none"> • II 1G, 1/2G Ex ia IIC T4 Ga or Ga/Gb <p>c-FM-us: FM20CA0003X</p> <ul style="list-style-type: none"> • CI I, Div 1, Gp ABCD T4; CI I, Zn 0, 0/1 Ex ia IIC T4 Ga or Ga/Gb <p>c-CSA-us: Certificate: 80000123</p> <ul style="list-style-type: none"> • Class I, Division 1, Groups A, B, C, D; Class II, Division 1, Groups E, F, G; Class III T4 Ex ia IIC T4 Ga, GaGb Class I, Zone 0, 0/1 AEx ia IIC T4 Ga, Ga/Gb <p>Any unauthorized modifications made to the device will invalidate the Ex-certification.</p> |

5. Performance specifications

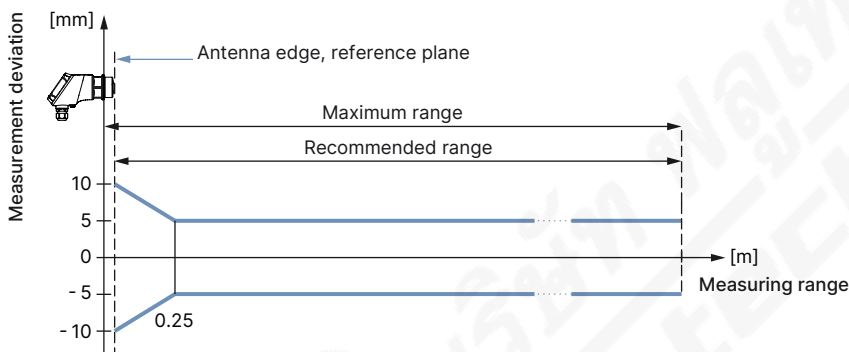

5.1. Measurement deviation diagram

The following drawings show the measurement deviation of Type 8131 according to the variant under the following process reference conditions according to EN 61298-1:

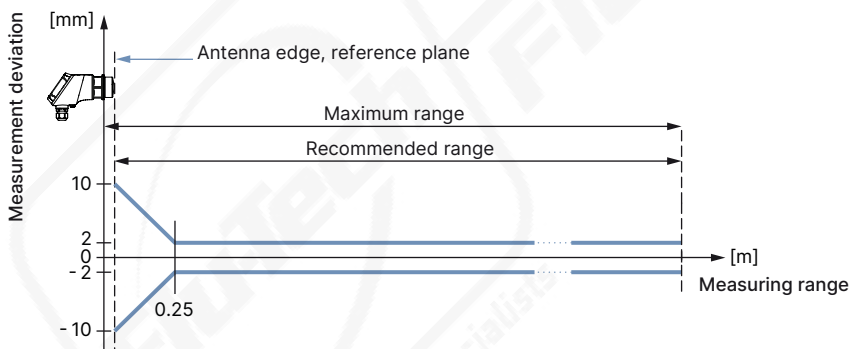

- Temperature: + 18...+ 30 °C (+ 64...+ 86 °F)
- Relative humidity: 45...75 %
- Air pressure: 860...1060 mbar
- Installation reference conditions:
 - Distance to installations: > 200 mm
 - Reflector: flat plate reflector
 - False reflections: biggest interfering signal, 20 dB smaller than the useful signal

In case of deviations from reference conditions, the installation-related offset can be up to ± 4 mm. This offset can be compensated by the adjustment.

Variant 0...10 m

Variant 0...20 m

6. Product installation

The Type 8131 level meter can be screwed directly onto a tank. However, threaded flanges, weld-on threaded connections or hygienic threaded adapters for simple adaptation to the process connection of the device with threaded connection are available as accessories. Adjustable brackets or swivel-head brackets are also available, allowing the instrument to be easily mounted on a wall or ceiling. Particularly in the case of open channels, this is a simple and effective way of aligning the sensor with the liquid surface.

Further information on accessories can be found in chapter **“8. Product accessories”** on page 11.

7. Product operation

7.1. Measuring principle

The radar measuring device for the measurement of liquid or bulk solids levels consists of a housing with electronics and a process connection with antenna. The lens-shaped antenna of the radar sensor emits a continuous, frequency-modulated radar signal. This is reflected by the liquid or bulk solids surface and received by the antenna as an echo. Radar waves propagate at the speed of light. The frequency difference between the transmitted and received signal is determined by special algorithms in the sensor electronics. The filling level is calculated, converted into a corresponding output signal and transmitted as a measured value.

The measuring range of the radar level measuring device Type 8131 begins physically at the end of the antenna.

7.2. Product operation notes

Operating techniques

Devices with integrated Bluetooth module can be adjusted wirelessly via standard adjustment tools:

- Smartphone/tablet (iOS or Android operating system)
- PC/notebook with Bluetooth USB adaptor (Windows operating system)

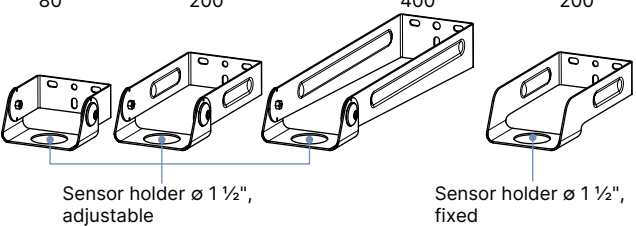

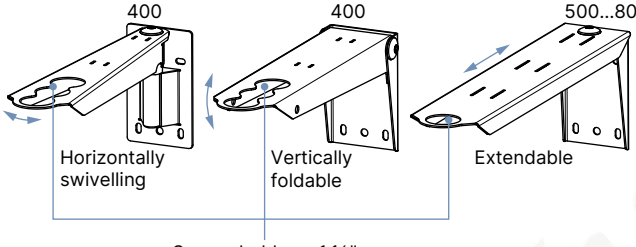

| Wireless connection to standard operating devices | Description |
|---|---|
| | 1 Radar filling level meter |
| | 2 Smartphone/tablet |
| | 3 PC/notebook with Bluetooth USB adaptor |
| Operation is via a free app from the "Apple App Store", the "Google Play Store" or the "Baidu Store". Alternatively, adjustment can also be carried out via PACTware/DTM and a Windows PC. | |
