

Insertion fitting for volume flow rate or analytical measurements

- Universal fitting for insertion measuring devices for neutral, aggressive or contaminated fluids
- A wide range of process connections: DN 06...DN 400 in PVC, PP, PVDF, PE, stainless steel or brass
- Transmitters can be supplied for display, monitoring, signal transmission, 2-point control and dosing control

Product variants described in the data sheet may differ from the product presentation and description.

Can be combined with

	Type 8020 Insertion flowmeter with paddle wheel for continuous flow measurement	▶
	Type 8025 Insertion flowmeter or batch controller with paddle wheel and flow transmitter or remote batch controller	▶
	Type 8026 Insertion flowmeter with paddle wheel, ELEMENT design	▶
	Type 8041 Electromagnetic insertion flowmeter	▶
	Type 8045 Electromagnetic insertion flowmeter	▶
	Type 8228 Inductive conductivity meter, ELEMENT Design	▶
	Type 8200 Armatures for analytical sensors	▶

Type description

The Type S020 fitting can be used to connect any insertion devices for in-pipeline measurement, such as for flow rate, pH, redox potential (ORP) or conductivity measurements.

The fitting is available for paddle-wheel and magnetic inductive flowmeters, as well as analytical measurement devices, with G 2" or clamp connections.

1. General technical data

Product properties

Material

Make sure the device materials are compatible with the fluid you are using.

Further information can be found in chapter [“3.1. Bürkert resistApp” on page 6.](#)

Non wetted parts

Screw Stainless steel (316L - 1.4404)

Wetted parts

Fitting body

- For G 2" flowmeter connection: Body & adapter respectively in brass (CuZn₃₉Pb₂) & stainless steel (316L - 1.4404) or all in stainless steel (316L - 1.4404), PVC, PP, PVDF or PE (depending on the fitting variant Type S020)
- For clamp flowmeter connection: Stainless steel 316L

Seal

- For G 2" flowmeter connection: FKM or EPDM (depending on the fitting variant Type S020)
- For clamp flowmeter connection: none

Surface quality

For fitting in stainless steel:

- For G 2" flowmeter connection
 - T-fitting
 - inner surface: Ra < 1.6 µm
 - outer surface: Ra < 3.2 µm
 - Straight connection and measuring chamber
 - inner surface: Ra < 1.6 µm
 - outer surface: Ra < 6.3 µm
- For clamp flowmeter connection
 - T-fitting
 - inner surface: Ra < 0.8 µm (excluding welding seams)
 - outer surface: Ra < 1.6 µm
 - Straight connection
 - inner surface: Ra < 0.6 µm
 - outer surface: Ra < 1.2 µm

Compatibility With flowmeters Type 8020, 8025, 8026, 8041, 8045 or analytical measuring devices Type 8200/8203, 8220 or 8228

Pipe diameter

- For G 2" flowmeter connection: DN 06...DN 400
Combination between fitting and measuring device is sometimes restricted to some DN. Further information can be found in chapter [“8.3. Combination of the S020 with a measuring device for flow rate, pH or ORP, conductivity measurement” on page 21.](#)
- For clamp flowmeter connection: DN 32...DN 100

Dimensions Further information can be found in chapter [“4. Dimensions” on page 6.](#)

Medium data

Fluid temperature¹⁾

For fitting in:

- PVC: 0...+ 50 °C (+ 32...+ 122 °F)
- PP: 0...+ 80 °C (+ 32...+ 176 °F)
- PVDF: - 15...+ 100 °C (+ 5...+ 212 °F)
- PE: + 5...+ 70 °C (+ 41...+ 158 °F)
- stainless steel, brass: - 15...+ 160 °C (+ 5...+ 320 °F)

Fluid pressure¹⁾

For fitting in:

- plastic: max. PN 10
- metal: max. PN 16

Further information can be found in chapter [“5.1. Pressure temperature diagram” on page 15.](#)

Process/Pipe connection & communication

Measuring devices connection G 2" or clamp connection

Pipe connection

For fitting in:

- plastic: true union with nut and solvent/fusion socket, spigot or external thread, saddle
- metal: internal or external thread, weld ends, clamp or flange

Approvals and conformities

Directives

CE directive	Further information on the CE directive can be found in chapter "2.3. Standards" on page 5.
Pressure equipment directive	Complying with article 4, paragraph 1 of 2014/68/EU directive Further information on the pressure equipment directive can be found in chapter "2.4. Pressure Equipment Directive (PED)" on page 5.
Foods and beverages/Hygiene	FDA declaration of conformity (stainless steel fitting only with EPDM seal) Must be ordered separately. Further information can be found in chapter "Accessories for all variants" on page 25.
Materials	<ul style="list-style-type: none"> • Inspection certificate 3.1 (according to EN-ISO 10204) • Certification of Conformity for the surface Quality (according to DIN4762, DIN4768, ISO/4287/1) Must be ordered separately. Further information can be found in chapter "Accessories for all variants" on page 25.
Others	<ul style="list-style-type: none"> • 3 points flow calibration certificate • Test report 2.2 (according to EN-ISO 10204) Must be ordered separately. Further information can be found in chapter "Accessories for all variants" on page 25.

Environment and installation

Ambient temperature	Operation and storage: the temperature limits also depend on the temperature limits of the inserted device, see the relevant data sheet or operating instructions for more information
---------------------	--

1.) The temperature and pressure limits also depend on the temperature or pressure limits of the inserted device, see the relevant data sheet or operating instructions for more information. If the specified temperature or pressure ranges for the fitting and the inserted device are different, use the most restrictive range.

2. Approvals and conformities

2.1. General notes

- The approvals and conformities listed below must be stated when making enquiries. This is the only way to ensure that the product complies with all required specifications.
- Not all available variants of the device can be supplied with the below mentioned approvals or conformities.

2.2. Conformity

In accordance with the Declaration of Conformity, the product is compliant with the EU Directives.

2.3. Standards

The applied standards which are used to demonstrate compliance with the EU Directives are listed in the EU-Type Examination Certificate and/or the EU Declaration of Conformity.

2.4. Pressure Equipment Directive (PED)

The device conforms to article 4, paragraph 1 of the Pressure Equipment Directive (PED) 2014/68/EU under the following conditions:

Device used on a pipe

Note:

- The data in the table is independent of the chemical compatibility of the material and the fluid.
- PS = maximum admissible pressure (in bar), DN = nominal diameter of the pipe

Type of fluid	Conditions
Fluid group 1, article 4, paragraph 1.c.i	DN ≤ 25
Fluid group 2, article 4, paragraph 1.c.i	DN ≤ 32 or PS*DN ≤ 1000
Fluid group 1, article 4, paragraph 1.c.ii	DN ≤ 25 or PS*DN ≤ 2000
Fluid group 2, article 4, paragraph 1.c.ii	DN ≤ 200 or PS ≤ 10 or PS*DN ≤ 5000

2.5. Foods and beverages/Hygiene

Conformity	Description
FDA	FDA – Code of Federal Regulations The variants with the housing made of stainless steel materials and the seal made of EPDM materials are compliant in their composition with the Code of Federal Regulations published by the FDA (Food and Drug Administration, USA) according to the manufacturer's declaration.

3. Materials

3.1. Bürkert resistApp

Bürkert resistApp – Chemical resistance chart

You want to ensure the reliability and durability of the materials in your individual application case? Verify your combination of media and materials on our website or in our resistApp.

5. Performance specifications

5.1. Pressure temperature diagram

1.) Excepted fitting DN 100 (-15...+160 °C, PN 10) with clamp measuring device connection

6. Product installation

6.1. Installation notes

Flow measurement

Note:

The fitting combined with a measuring device is not suitable for use in gaseous media and steam.

Minimum straight distances upstream and downstream of the sensor must be observed. These stabilizing distances depend on the pipe's design. Increasing these distances or installing a flow conditioner may be necessary to obtain the best accuracy. For more information, refer to EN ISO 5167-1.

EN ISO 5167-1 specifies the straight inlet and outlet distances that must be complied with when installing fittings in pipe lines in order to achieve calm flow conditions. The most commonly used elements that could lead to turbulence in the flow are shown below. The related minimum inlet and outlet distances that ensure a calm flow are also specified.

Make sure that the measuring conditions at the point of measurement are calm and problem-free.

1.) If the valve cannot be mounted after the measuring device, the minimal distances have to be respected.

2.) If an expansion cannot be avoided, the minimal distances have to be respected.

Please note minimum flow velocity

The complete measuring device can be installed in either horizontal or vertical pipes, but following additional conditions should be respected:

- The pipe always has to be filled with fluid at all times near the device.
- The pipe design must be such that no air bubbles or cavitation can form within the medium near the device at any time.

Pressure and temperature ratings must be respected according to the selected fitting material. The suitable pipe size is selected using the diagram in the chapter "Nominal size selection" of the fitting, see chapter **"6.2. Selection of the nominal diameter" on page 17**.

Analytical measurement

For these analytical measurements, we recommended a "U"-form bypass installation to ensure that the sensor does not dry out and can also be calibrated without stopping the whole process or to use the special designed measuring chamber.

The specially designed measuring chamber enables to install all pH, ORP, conductivity measuring devices in all pipe systems, either directly in the main flow or in a by-pass line. Additionally, the electrode is always be kept wet and is easily isolated from the main flow for calibration purposes.

6.2. Selection of the nominal diameter

The following graph is used to determine the appropriate DN of the pipe and fitting for the application, according to the fluid velocity and the flow rate. On the chart, the intersection of flow velocity and flow rate gives the appropriate diameter.

Note:

- For the fittings listed below, the corresponding nominal size in the bracket must be used:
 - External threads acc. to SMS 1145
 - Weld ends acc. to SMS 3008, BS4825-1/ASME BPE/DIN 11866 series C or DIN 11850 series 2/DIN 11866 series A/DIN EN 10357 series A
 - Clamp acc. to SMS 3017, BS 4825-3/ASME BPE or DIN 32676 series A.
- For all other fittings, the corresponding nominal diameter without bracket applies.

Example 1:

- Nominal flow: 10 m³/h
 - Optimal flow rate: 2...3 m/s
- Result: Select a pipe size of DN 40

Example 2 with external threads acc. to SMS 1145:

- Nominal flow: 10 m³/h
 - Optimal flow rate: 2...3 m/s
- Result: Select a pipe size of DN 50

1.) See note at the beginning of this chapter.

7. Product accessories

Note:
Since March 2012, the Type S020 fittings in DN 15 and DN 20 have been available in 2 variants with different K factors. Further information can be found in the user manual in the K factor chapter, see **Type S020 ▶**.

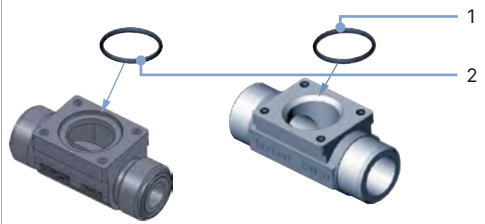

The 2nd variant is identified by the “v2” marking. This “v2” marking can be found:

- on the bottom of the DN 15 or DN 20 fitting in plastic

- on the side of the DN 15 or DN 20 fitting in metal

Accessory	No.	Description
	1	O-ring seal for metal fitting
	2	O-ring seal ¹⁾ for plastic fitting

1.) The O-ring is only intended for fitting body with flat bottom groove. The O-ring is not suitable for fitting body with ribbed groove (old variant).

8. Networking and combination with other Bürkert products

8.1. Fitting for measuring device with G 2" process connection

Example:

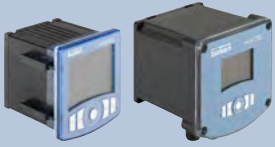

Flowmeter				
				
Type 8020 ▶ Insertion flowmeter with paddle wheel	Type 8025 ▶ Insertion flowmeter or batch controller with paddle wheel	Type 8026 ▶ Insertion flowmeter with paddle wheel, ELEMENT design	Type 8041 ▶ Magnetic inductive Insertion flowmeter	Type 8045 ▶ Magnetic inductive Insertion flowmeter
Analytical measuring device				
				
Type 8200 ▶ + Type 8203 ▶ Armatures and pH- or ORP probes	Type 8220 ▶ Conductivity sensor	Type 8228 ▶ Conductivity sensor, ELEMENT design		
Transmitter				
				
Type 8619 ▶ multiCELL - transmitter/controller	Type 8025 ▶ Flow transmitter (only for flowmeter)		Type 8611 ▶ eCONTROL - Universal controller panel, wall or rail-mounting variant	

8.2. Fitting for for flowmeter with clamp process connection

Example:

Flowmeter	
	
Type 8041 ▶ Magnetic inductive Insertion flowmeter	Type 8045 ▶ Magnetic inductive Insertion flowmeter

Transmitter		
		
Type 8619 ▶ multiCELL - transmitter/controller	Type 8025 ▶ Flow transmitter	Type 8611 ▶ eCONTROL - Universal controller panel, wall or rail-mounting variant

8.3. Combination of the S020 with a measuring device for flow rate, pH or ORP, conductivity measurement

For device with G 2" connection		DN 06	DN 32	DN 50	DN 65	DN 100	DN 200	DN 350	DN 400
Available Type S020 fittings DN	T-fitting 								
	Welding socket 								
	Fusion spigot 								
	Screw-on spigot 								
	Saddle 								
For device with clamp connection									
T-fitting or welding socket 									
Device for	Flow rate measurement Type 8020, 8025, 8026, 8041 and 8045 with G 2" process connection	DN 06	DN 15	DN 20 ¹⁾	DN 32 ¹⁾	DN 50	DN 100	DN 200	DN 400
	Type 8041 and 8045 with clamp process connection								
	Analytical measurement pH or ORP: Type 8200/8203 Conductivity: Type 8220, 8228								

1.) DN 20 fittings according to the following standards cannot be used with flowmeters Type 8020, Type 8025 and Type 8026.

DN 32 fittings according to the following standards cannot be used with analytical measuring devices Type 8200/8203, Type 8220 and Type 8228.

Standards: fittings with external threads according to SMS 1145, weld ends according to SMS 3008, BS 4825-1/ASME BPE/DIN 11866 series C or DIN 11850 series 2/DIN 11866 series A/ DIN EN 10357 series A, Clamp according to SMS 3017, BS 4825-3/ASME BPE, DIN 32676 series A.

2.) See the note for the use of the fitting in chapter "4. Dimensions" on page 6

3.) Only use plastic fittings with true union process connection in analytical variant, with nut and solvent/fusion socket according to DIN 8063 (PVC), to DIN 16962 (PP) or to ISO 10931 (PVDF), other materials are available on request.

For further details about the various combination possibilities (measuring device and fitting), please **consult the measuring device related data sheet**.

9. Ordering information

9.1. Bürkert eShop

Bürkert eShop – Easy ordering and quick delivery

You want to find your desired Bürkert product or spare part quickly and order directly? Our online shop is available for you 24/7. Sign up and enjoy all the benefits.

[Order online now](#)

9.2. Bürkert product filter

Bürkert product filter – Get quickly to the right product

You want to select products comfortably based on your technical requirements? Use the Bürkert product filter and find suitable articles for your application quickly and easily.

1.) Refer to BS 4825-1/ASME BPE/DIN 11866 series C or to DIN 11850 series 2/DIN 11866 series A/DIN EN 10357 series A.

Further variants on request

Process connection

According to EN ISO 1127/ISO 4200/DIN 11866 series B (DN 32...DN 80)

9.4. Ordering chart accessories
Accessories for all variants

Description	Article no.
Approvals/Certificates	
3 points flow calibration certificate ^{1.)}	550676 ☞
Inspection certificate 3.1 (according to EN-ISO 10204)	803723 ☞
Test report 2.2 (according to EN-ISO 10204)	803722 ☞
Certification of Conformity for the surface Quality (according to DIN4762, DIN4768, ISO/4287/1)	804175 ☞
FDA declaration of conformity	803724 ☞

1.) S020 in combination with the inserted flow measuring device inserted, only for DN ≤ 200

Accessories for fitting for measuring device with G 2" process connection
Note:

Since March 2012, the Type S020 fittings in DN 15 and DN 20 have been available in 2 variants with different K factors. The 2nd variant is identified by the "v2" marking.

See chapter "7. Product accessories" on page 18.

Accessory	Description	Article no.
Sealing plug with ring, union nut and O-ring		
	Stainless steel	438755 ☞
	PVC	438754 ☞
	PP	627614 ☞
Adapter with 4 screws (DN 06...DN 65)		
	Stainless steel	555484 ☞
	PVC	561175 ☞
	PP	561176 ☞
	PVDF	561177 ☞
O-Ring set (DN 06...DN 65)		
Between fitting body & adapter		
FKM - for metal fitting (5 parts)		428971 ☞
EPDM - for metal fitting (5 parts)		428972 ☞
FKM - for plastic fitting (1 part ^{1.)})		561043 ☞
EPDM - for plastic fitting (1 part ^{1.)})		561044 ☞

1.) The O-ring is only intended for fitting body with flat bottom groove. The O-ring is not suitable for fitting body with ribbed groove (old variant).

Accessories for fitting for flowmeter Type 8041/8045 with clamp process connection

Accessory	Description	Article no.
	1 EPDM fitting/measuring device seal	730837 
	1 FEP fitting/measuring device seal	730839 
	Clamp collar	731164 
	Sealing plug for fitting	565200
